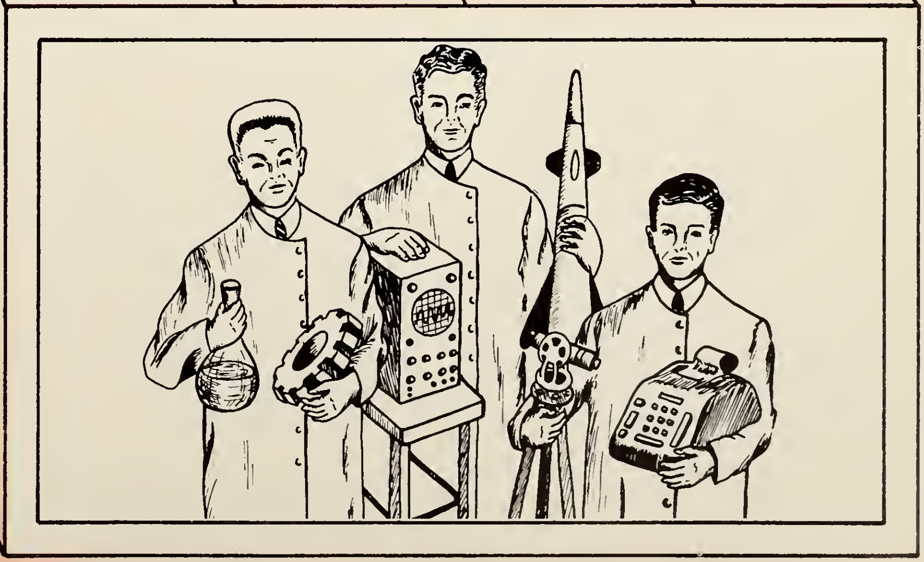
PRESENTED
BY THE
1960 MODULUS
STAFF

under the supervision of
PROFESSOR PETER F. HOLUB
Chairman, Department of English

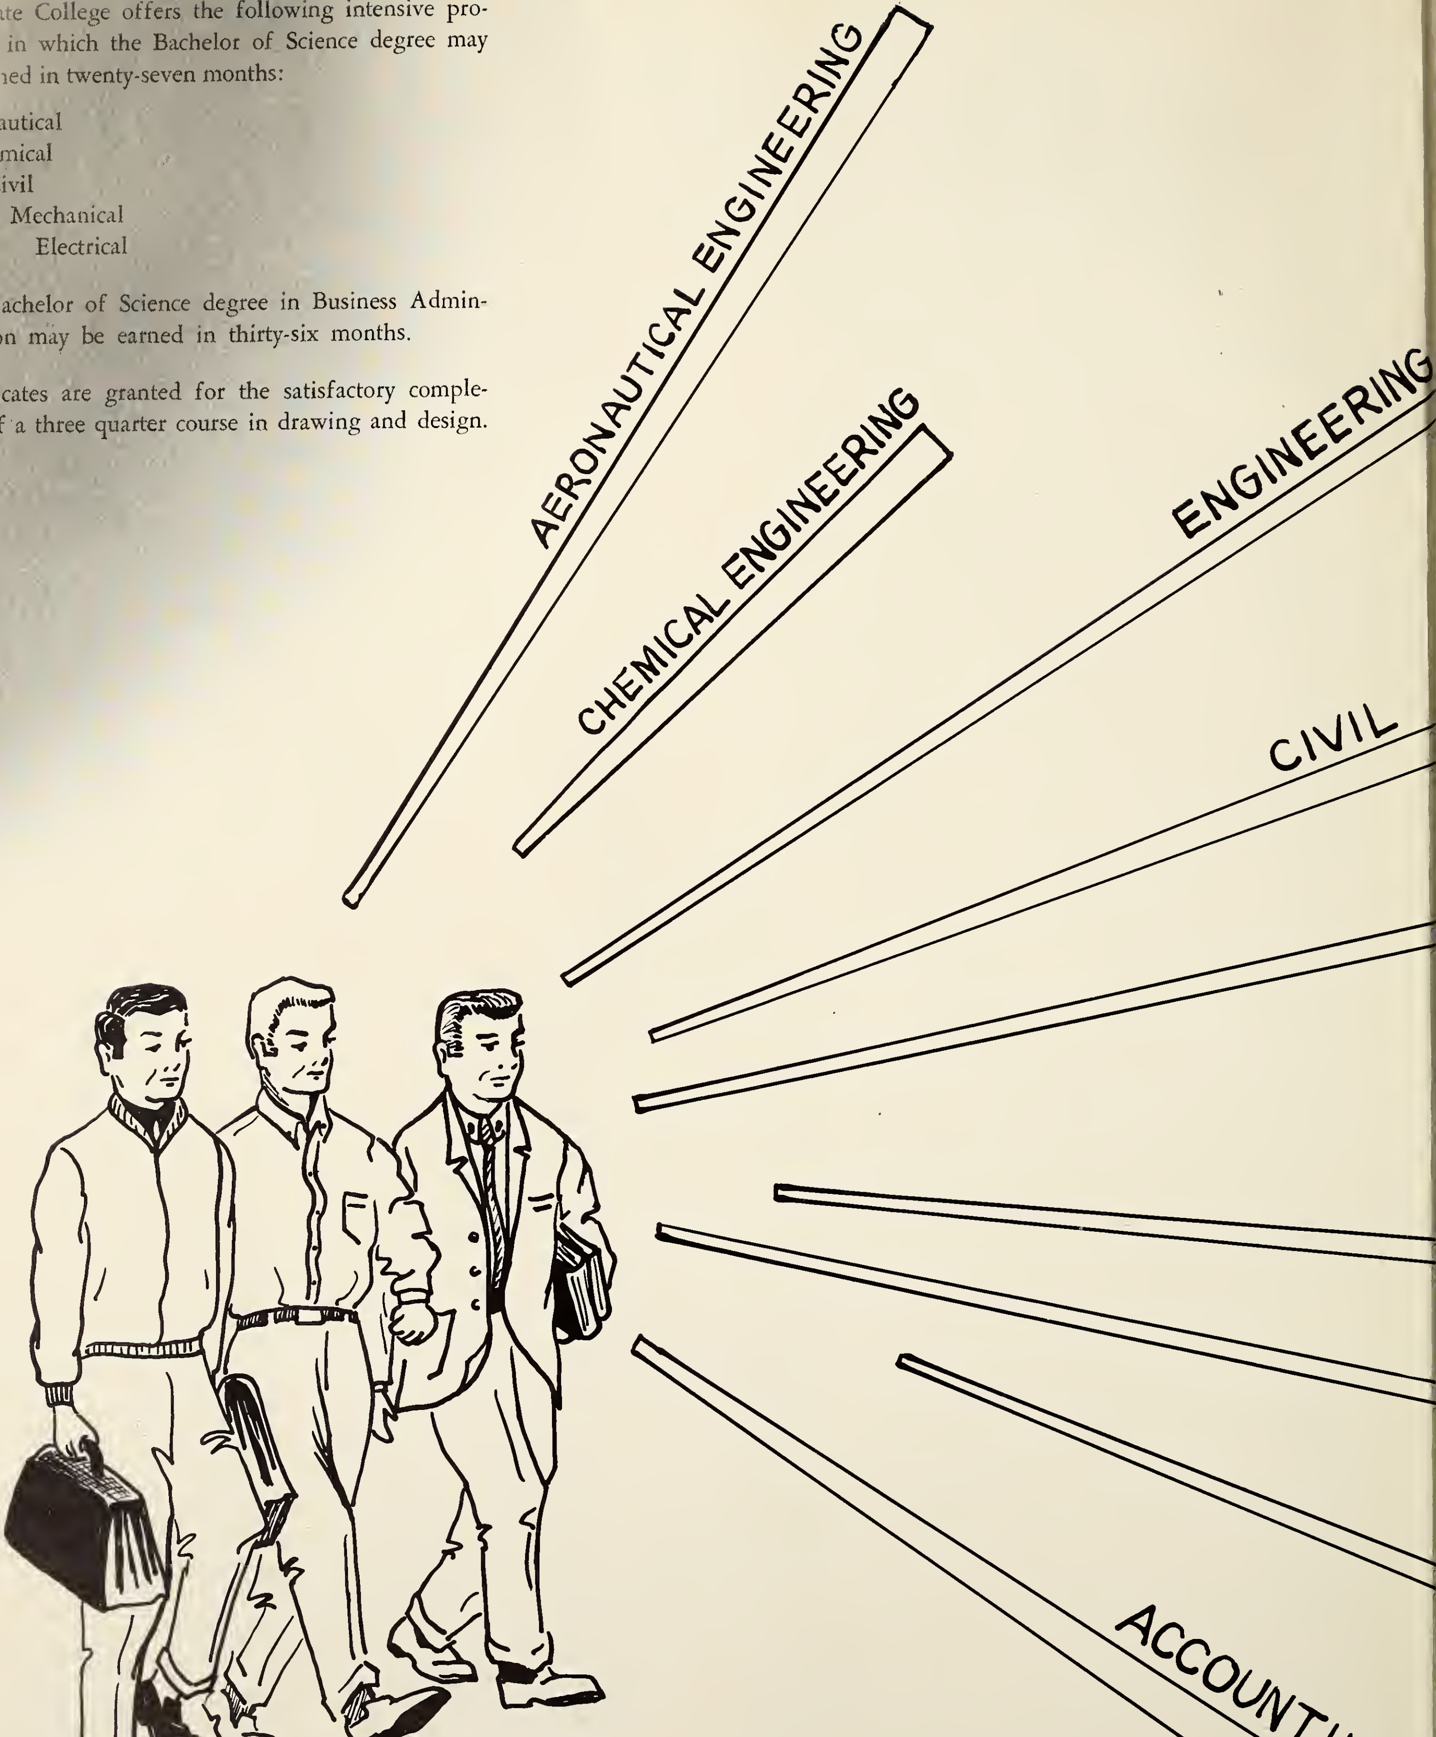


Tri-State College offers the following intensive programs in which the Bachelor of Science degree may be earned in twenty-seven months:

Aeronautical
Chemical
Civil
Mechanical
Electrical

The Bachelor of Science degree in Business Administration may be earned in thirty-six months.

Certificates are granted for the satisfactory completion of a three quarter course in drawing and design.



FOREWORD

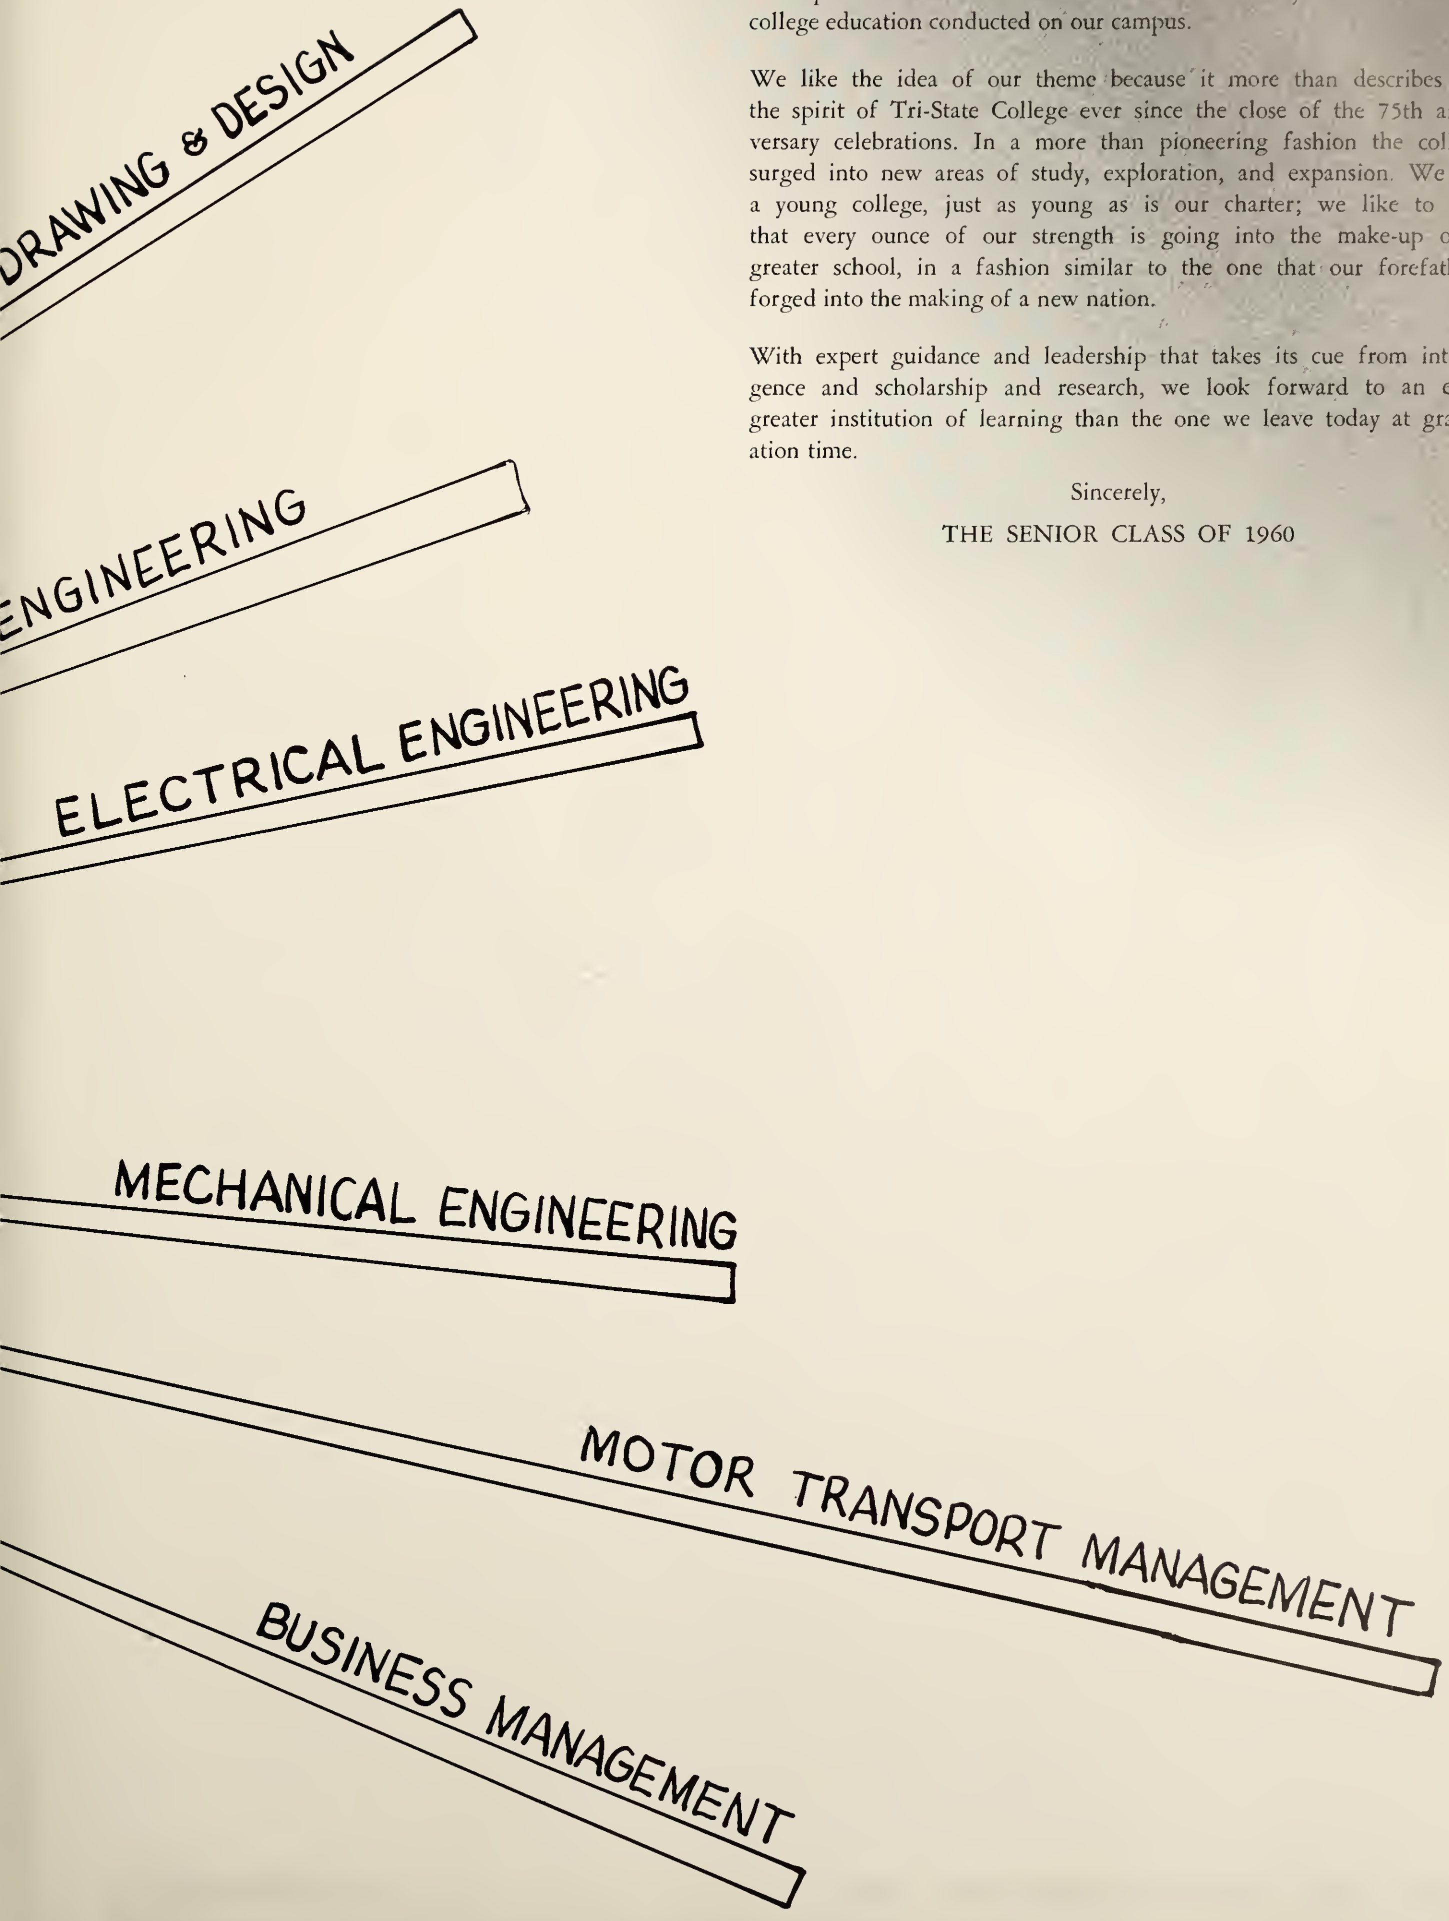
The Spirit of '76 is our theme and also the 76th year of continuous college education conducted on our campus.

We like the idea of our theme because it more than describes the the spirit of Tri-State College ever since the close of the 75th anniversary celebrations. In a more than pioneering fashion the college surged into new areas of study, exploration, and expansion. We are a young college, just as young as is our charter; we like to feel that every ounce of our strength is going into the make-up of a greater school, in a fashion similar to the one that our forefathers forged into the making of a new nation.

With expert guidance and leadership that takes its cue from intelligence and scholarship and research, we look forward to an even greater institution of learning than the one we leave today at graduation time.

Sincerely,

THE SENIOR CLASS OF 1960



DEDICATION

We dedicate this
1960 Modulus
to DR. PERRY T. FORD . . .

. . . became a great executive . . .

who, with the inspired guidance toward greater humanitarian efforts constantly given by his loving wife . . .

. . . a renowned scholar and leader . . .

. . . respected and admired by outstanding men in all fields.

"The highest honor this college has to award was conferred upon you several years ago, the honorary degree Doctor of Engineering. This honor we cannot now confer, but we the staff, faculty, student body, and graduating class do say to you that you have our respect, our gratitude, our loyalty, and above all, our sincere thanks for your leadership during the past year."

These words were spoken to Dr. Ford at the 1960 commencement by Dr. J. Glenn Radcliffe, Chairman of Academic Affairs.

These words were spoken in appreciation for the way Dr. Ford rallied the college to newly inspired heights within the one year that he so unselfishly and with great magnanimity steered the school as its acting president.

His genuine interest in what he did and in what he believed to be the right thing to do created an unsurpassed faculty, staff, and student morale during the interim period.

He came into our midst with the greatest confidence that the college would achieve new and great accomplishments within a short time; his convictions and beliefs became a reality before his successor was named.

Dr. Ford . . . a maker of Presidents,

. . . a genial host and a worthy man.

CAMPUS SCENES WE WILL NEVER FORGET . . .

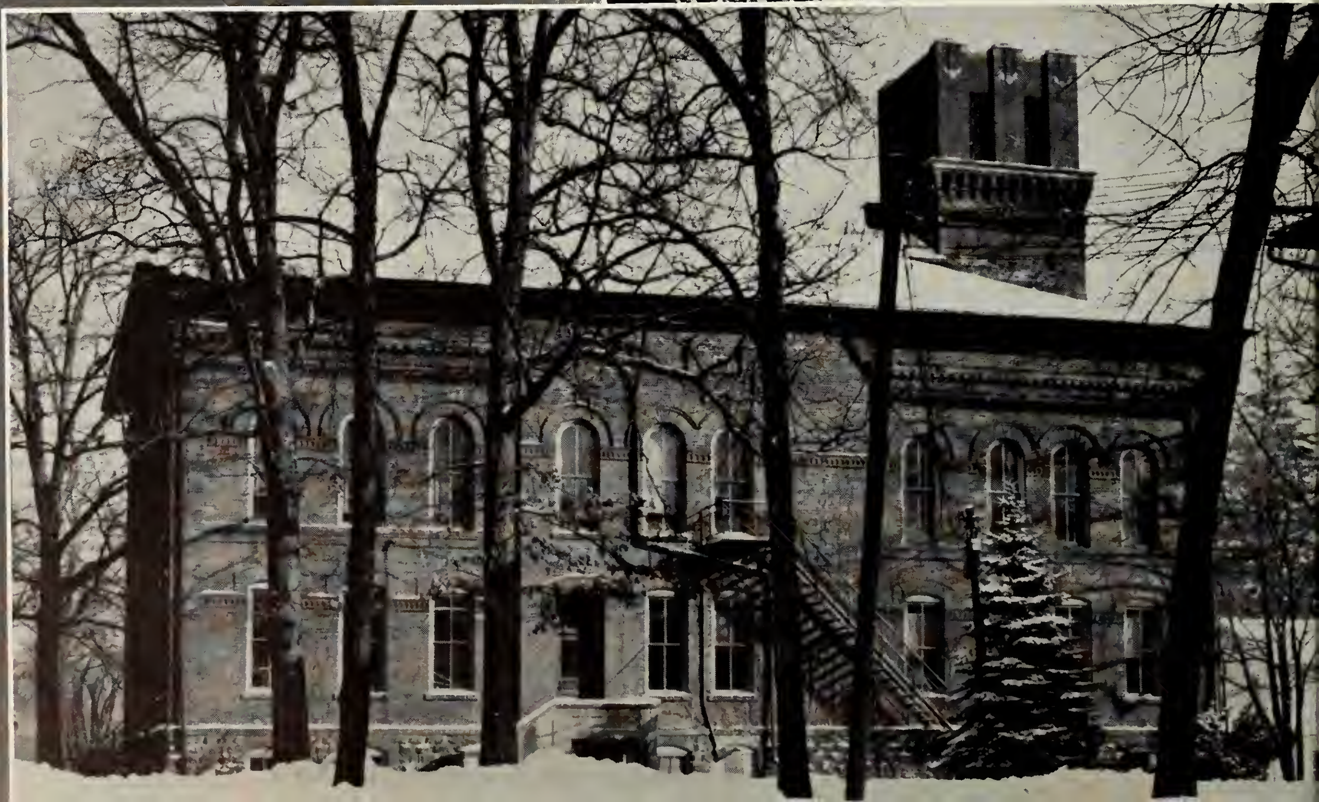
1884

1960

The Old Main is a symbol to us. It represents the solid foundation upon which rests our future with the education that we got here. We acquired learning, not just mere training. Our future will be based upon intelligence and perseverance and above all, respect for our fellow man no matter who he may be.

Looking at the Old Main from Darling

How it looked to us from our Park Street apartment . . .



In these halls we learned that scientific thought is a development of pre-scientific thought. As the concept of space was already fundamental in the latter, we must begin with the concept of space in pre-scientific thought. Einstein said that there are two ways of regarding concepts, both of which are necessary to understanding. The ways are logical analysis connected with sensible experience.

We look to you, our alma mater . . .

Through these portals enter the best Civil and Chemical Engineers in the land . . .

High on the windy hill but not alone stands the hall that is proud to say, "My boys rule the commerce and business world today."

"Did you see the poster in Doc Slagle's office up in the chem building? These words are written on it: IF IT WORKS, IT'S OBSOLETE."

In science, each of us knows that what he has accomplished will be antiquated in a few short years. That is the fate to which science is subjected; it is the very meaning of scientific work.

Every scientific fulfillment raises new questions; it asks to be surpassed and outdated. Whoever wishes to serve science has to resign himself to this fact.

The wintry snows add the touch from the unknown to our halls of science.

Men of science form an organized army, laboring on behalf of the whole nation, and generally under its direction, and at its expense, to augment the stock of such knowledge as may serve to promote industrial enterprise, to increase wealth, to adorn life, to improve political and social relations, and to further the moral development of individual citizens.

. . . wavering to and fro
Crossed and recrossed the winged snow:
And ere the early bedtime came
The white drift piled the window-
frame . . .

We are convinced that whatever contributes to the knowledge of the forces of nature or the powers of the human mind is worth cherishing, and may, in its own due time, bear practical fruit, very often where we should least have expected it.

. . . and in the early Spring there always comes new glamour to our stately halls of ivy.

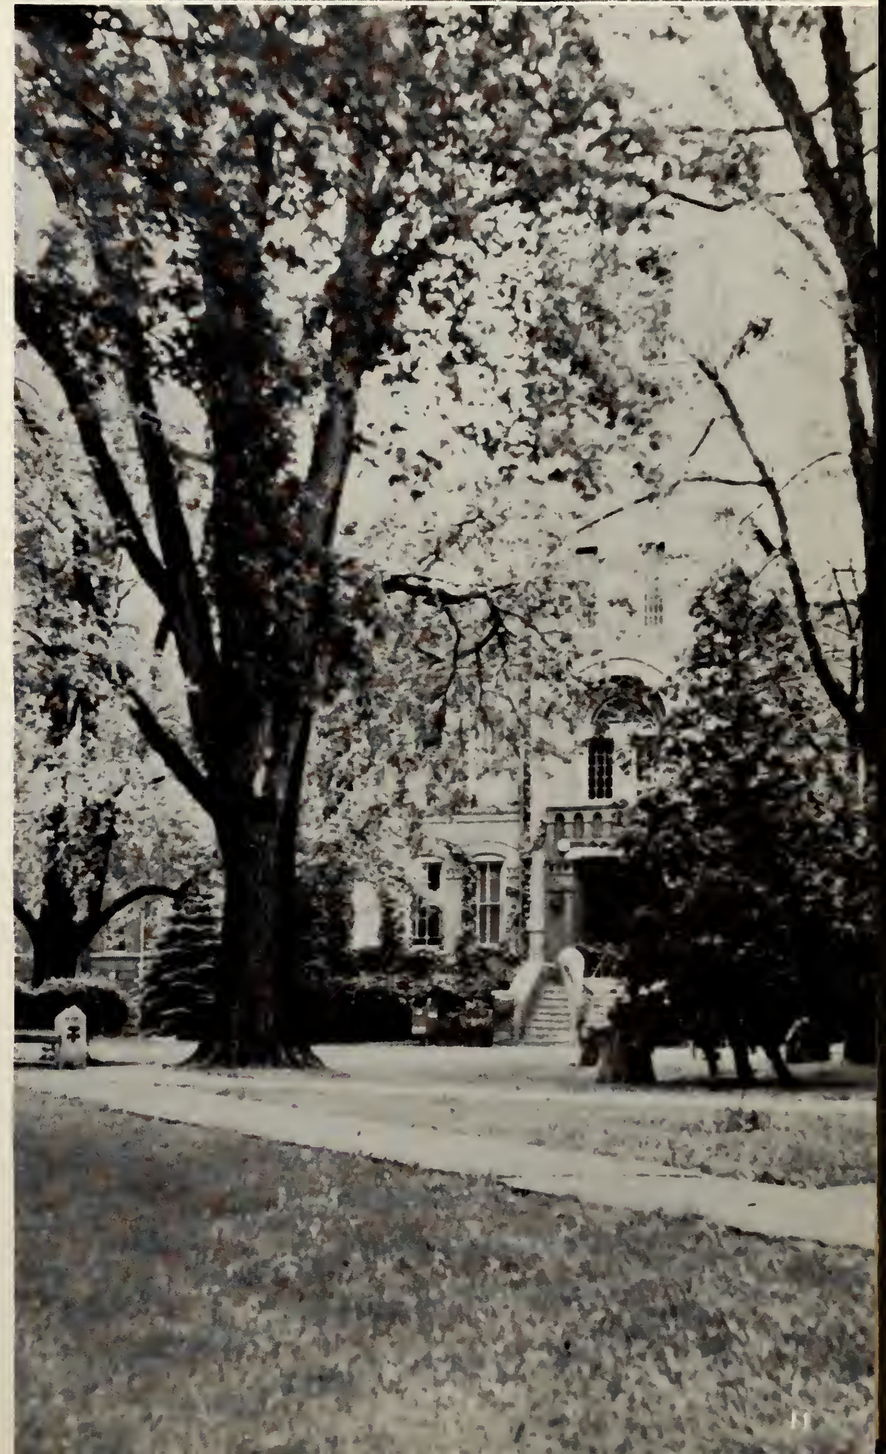
In the history of scientific thought, there are moments when great, earth-shaking evolutions are produced, and decisive distances that formerly existed, disappear.

The progressive formation and coincidence of individual efforts converging toward the same end often takes place without knowledge of those engaged in the work. Powerful currents of thought emerge simultaneously.

The exact form of whole branches of science whose great features had only been vaguely seen by precursors is suddenly illumined by the work of superior minds.

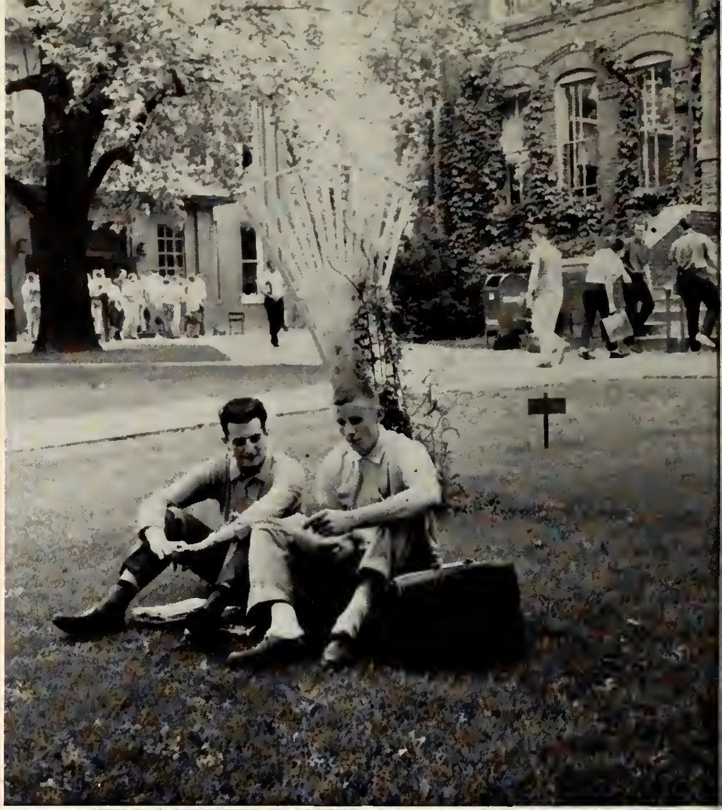
It becomes a glorious era of scientific thought from which all progress issues forth in the years that follow.

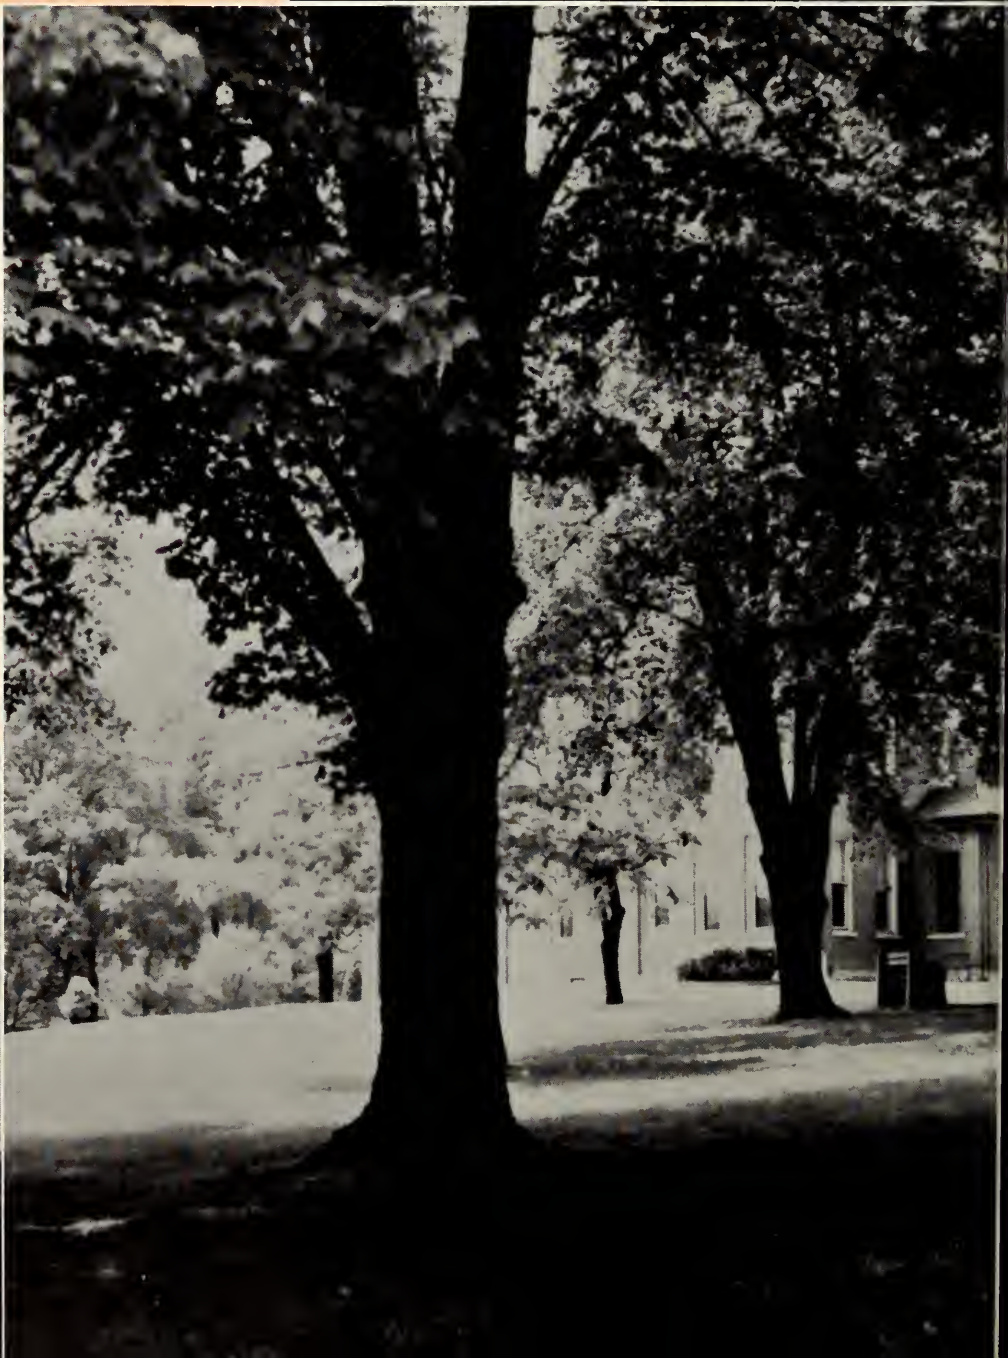
. . . but ah, the summer, if only it would stand still for an eternity!



We often sat on the lawns and talked and thought that the scientist's most important educative task is to get the average man to feel that the life of the intellect not only is a good life for those who actively lead it, but that it is also good for society as a whole that the intellectual life should be made possible for those capable of it, and that it should be prized and rewarded by the entire community.

The average man, we felt, could be made to see that scientific freedom is merely freedom to be intelligent, and that the need for this freedom is born with us, and that we will practice it in the inmost recesses of our thoughts no matter what the external constraints.



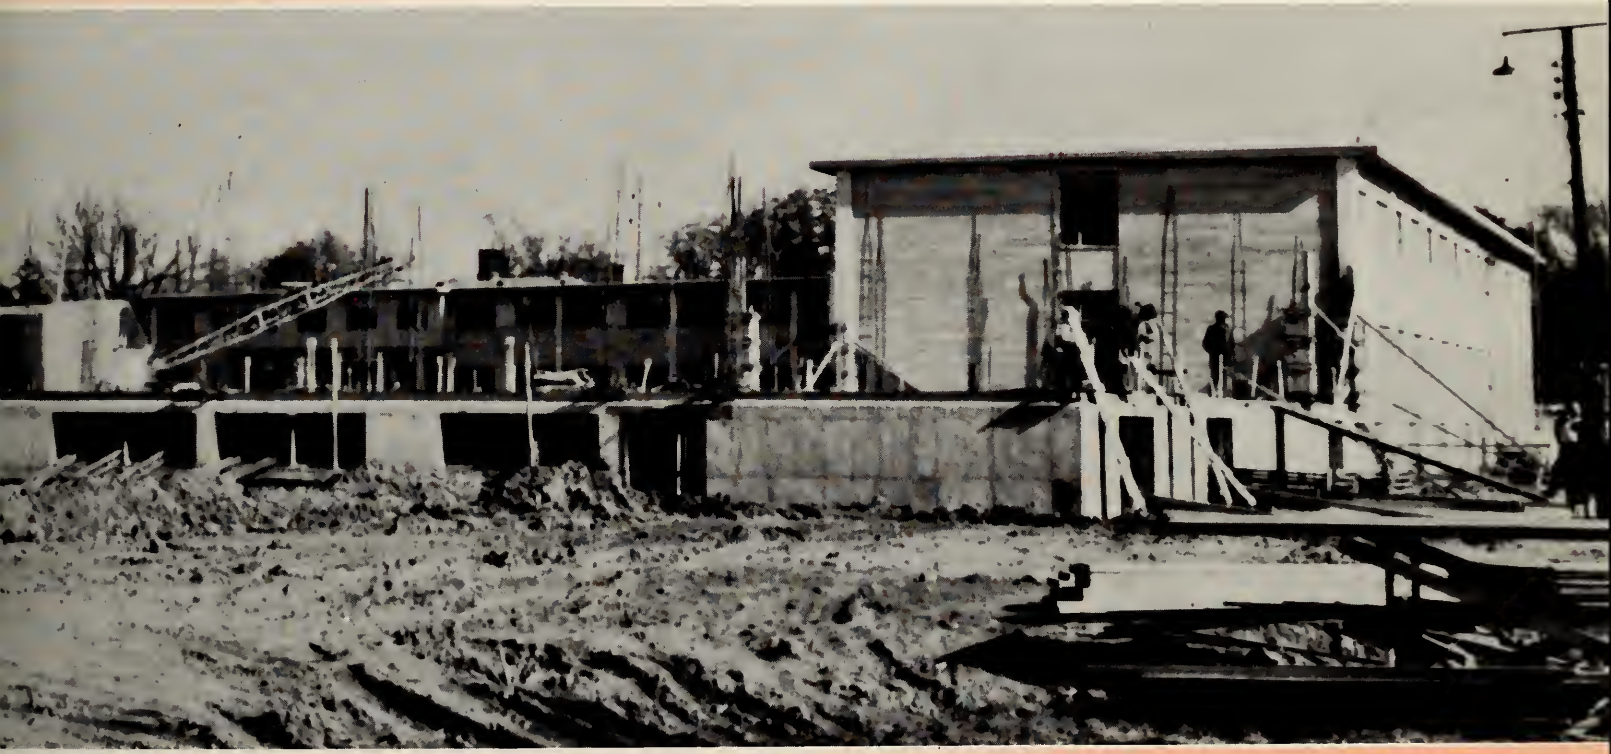


The gradual development of the material world is one of a natural movement from the simple to the complex.

This movement conforms with all our daily experiences, and it also conforms with our natural logic.

Every degree of being in the universe is subordinate to another, and graded from the lowest to the highest.

The intellectual is the finest and highest faculty, not only in man, but in all of the lower world.



The end-all of knowledge is to know that we cannot know anything. But there are two sorts of not-knowing.

The one is the immediate not-knowing, when a man does not even begin to examine and try to know, because it is impossible to know.

Another, however, examines and seeks until he comes to know that one cannot know.

ADMINISTRATION

. . . and the administration shall at all times have vested in it the rights and privileges to conduct the affairs of the college to the interest of all its students and faculty. At no time shall an administrator place egocentric motives ahead of those of the school.

SCHOOLS

A college is composed of its schools, and the schools are made of the people who live, work, and learn in them. The following pages honor the graduates of Tri-State College and the faculty members who taught them.

PROF. QUINTIN HAWTHORNE
Chairman of Department

DEPARTMENT OF AERONAUTICAL ENGINEERING

The primary objective of the courses in Aeronautical Engineering is to provide sound training in the fundamentals and also familiarize the student with the principles of flight and the design and constructon of aircraft.

The department was started in 1931 and has kept pace with the growth of the aircraft industry. A modern wind tunnel gives the student a chance to apply classroom theory to practical problems in the construction of aircraft.

DEPARTMENT OF CHEMICAL ENGINEERING

DR. KENNETH SLAGLE
Professor, Chairman of Department

The Chemical Engineering program is designed to prepare students for careers in the chemical and petroleum industry, which needs men who can develop, design, and operate new processes.

In this department the purpose is to offer a sound background in the fundamentals. The chemical engineering and chemical laboratory work helps students to understand the principles covered in the classroom.

The department was founded in 1912 and has been expanding throughout the years. Plans for the future include the improvement of course content to meet the demands of industry.

DEPARTMENT OF CIVIL ENGINEERING

Civil Engineering, the oldest of the engineering professions, was first offered at Tri-State College in 1902. Civil Engineering projects involve three phases: Conception, Design, and Construction. The curriculum is designed to give the student good understanding of these phases, along with the scientific background required for a creative civil engineer.

Laboratories and a twenty-acre survey area give the student the required practical knowledge to supplement his theoretical studies.

DEPARTMENT OF ELECTRICAL ENGINEERING

PROF. RALPH W. GILCHRIST
Chairman of Department

The Electrical Engineering department was organized in the early 1900's at Tri-State College. The objective of the department is to provide the student with a foundation for a professional, industrial, or business career based on electrical engineering.

After a thorough training in the fundamentals of electrical engineering, the student can specialize for a career in the field of electronics and communications or power and automation engineering.

Well-equipped laboratories enable the student to obtain a practical understanding of electrical and electronic equipment.

DEPARTMENT OF MECHANICAL ENGINEERING

The Mechanical Engineering Department was organized at Tri-State College in the early 1900's. Since then it has expanded into the department with the largest enrollment on campus.

Mechanical engineering covers all basic fields of engineering and borrows fundamentals from other fields. Consequently, it is important in all of present-day industry. With this in mind, the department offers a diversified course in the fundamentals of engineering and gives the student the required background for the broad field of mechanical engineering.

SCHOOL OF COMMERCE

The school for general business administration has the objective of giving the student both a general educational background as well as work of a professional nature in the different business areas. This gives the student preparation for the supervisory and administrative positions of the business enterprises of tomorrow.

In 1956-57 the school changed its name from Business Administration to General Business. At that time the course length was extended to twelve quarters.

MOTOR TRANSPORT

The Motor Transportation Management Department was established in 1955. The program was planned as a four-year course leading to a bachelor degree in Business Administration. The purpose of the program is to foster motor carrier education by providing specialized courses at the college level and to stimulate the interest of students in adopting a career in the motor transportation industry.

ACCOUNTING

The first accounting department was established in 1928 at Tri-State College. This course consisted of a six-quarter curriculum. In 1956-57 the course length was changed to twelve quarters. The objectives of this curriculum are to give the student a broad background of liberal arts and general business, in addition to the technical skill and philosophy of the practical accountant.

DEPARTMENT OF ENGINEERING DRAWING AND DESIGN

The department of Drawing and Design fulfills two major functions. Not only does it allow regular engineering students to take advanced courses, but also enables students interested in drafting to take a special thirty-six week course in drawing and design which enables them to enter industry as well-trained draftsmen.

DEPARTMENT OF ENGLISH AND SPEECH

The Department of English and Speech was founded in 1921 to teach English to engineering students. From the small beginning the departmental offerings grew until now a student can complete 35 hours of work toward his requirements for graduation. Besides the required courses in general composition and technical writing, the department now offers courses in advanced composition and literature.

DEPARTMENT OF MATHEMATICS AND ENGINEERING MECHANICS

Organized and administered as a service department to the School of Engineering, the Department of Mathematics and Engineering Mechanics emphasizes both the theoretical and the practical aspects of mathematics as it relates to engineering and science.

Starting in March 1960 the department offers a course in advanced calculus for those students who are interested in studying advanced mathematics or plan to go to graduate school.

Recognizing the importance of mathematics for engineering students, the student is given ample preparation for specialization in pure and applied mathematics and at the same time is given a foundation for his future studies in all phases of engineering.

DEPARTMENT OF PHYSICS

The Department of Physics was instituted in 1921 as a service department to the school of engineering. The objective of the department is to give the engineering student the necessary fundamentals of physics before he enters the advanced phases of his engineering program.

By expanding the laboratory and classroom facilities, the department plans to offer to the student more opportunities to study the latest developments in the field of physics.

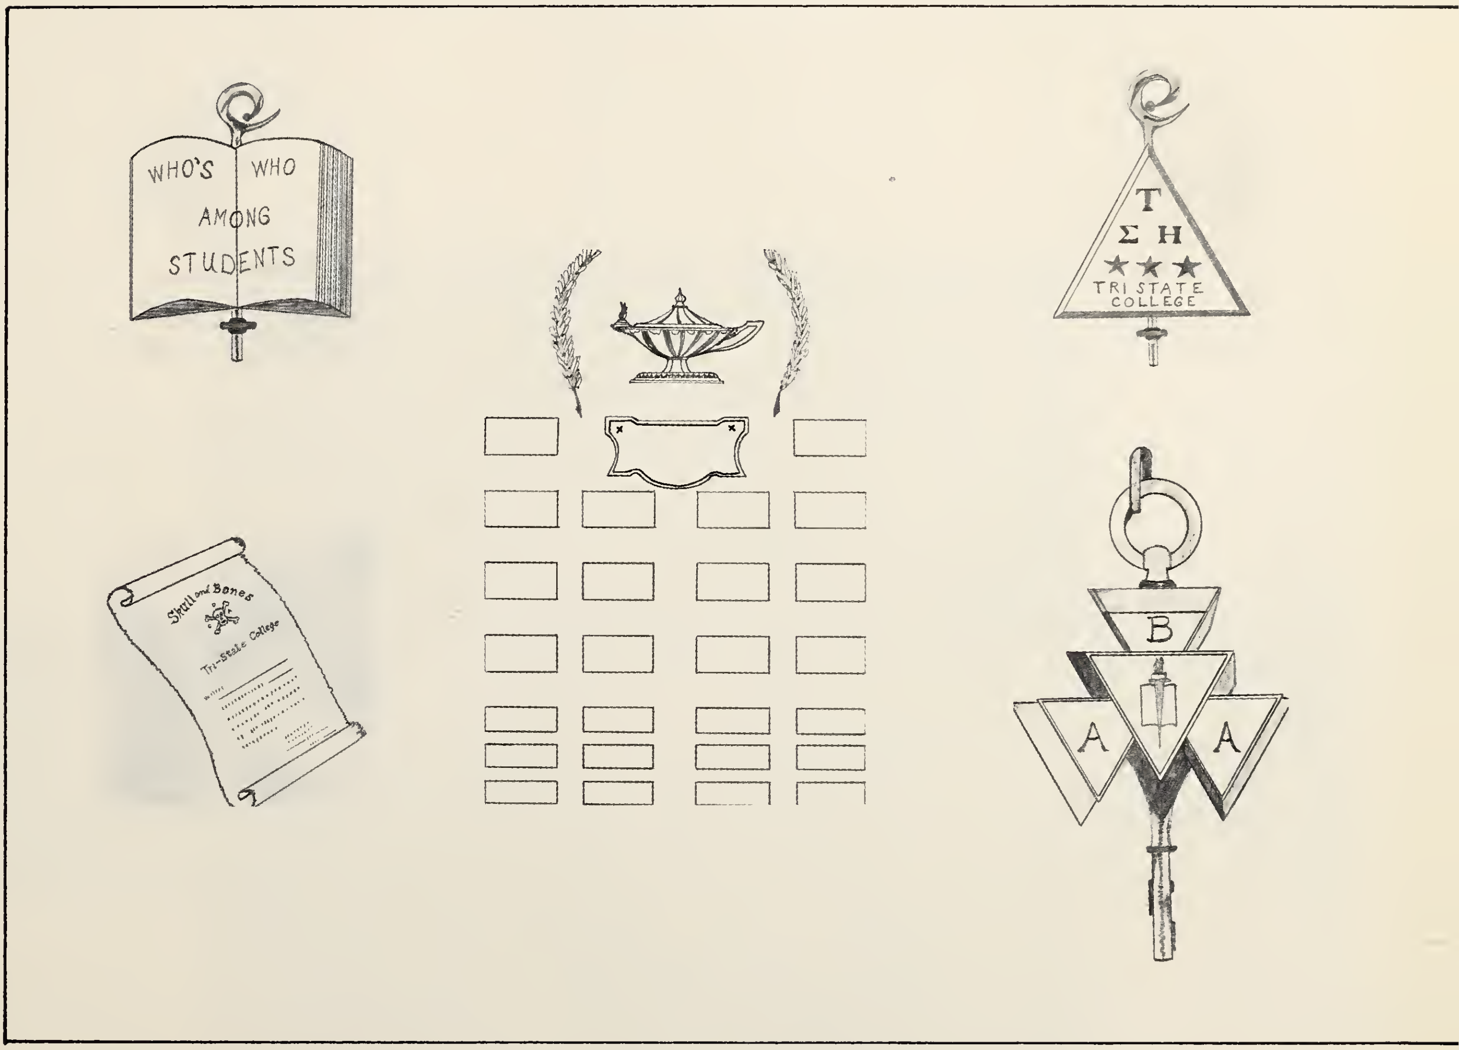
HONORARIES



For these symbols of academic and other types of college leadership the students of Tri-State College compete.

WHO'S WHO AMONG STUDENTS

The selection of graduating students for inclusion in "Who's Who Among Students in American Universities and Colleges" is conducted by a faculty committee and then by approval of a national board. Selection is on the basis of scholarship, leadership, citizenship, and promise of future usefulness to society.

Tau Sigma Eta, the Honorary Engineering Society, was founded on campus in 1950. Its membership is open to those students enrolled in the School of Engineering who maintain a high scholastic average.

To be eligible for membership, the student must maintain an average of 3.1 during four consecutive quarters while carrying a 20 hour load per quarter. To remain active in the honorary the student is required to maintain a 3.0 average.

The purpose of Tau Sigma Eta is to promote high scholastic achievement and to offer tutoring service to fellow engineering students.

Alpha Beta Alpha, the Honorary Commercial Society, was founded in 1938 by two of the present faculty advisers, Professors Howard Hoolihan and Harold Hoolihan. Alpha Beta Alpha was organized to promote scholastic achievement, leadership, and character among the students enrolled in the School of Commerce at Tri-State College.

To be eligible for election to Alpha Beta Alpha the student must maintain an average grade of "A" for the preceding four quarters prior to his election or an average grade of "B" for six quarters prior to his election. Students meeting the requirements of leadership and character are then initiated into the honorary.

TRI-STATE STUDENT DIRECTORS

The Tri-State Student Directors were organized in 1954. The membership is representative of students from both the School of Commerce and Engineering and are selected on the basis of leadership, scholarship, dependability, co-operation, and the desire to promote the welfare of the college.

The Student Directors assist the Dean of Students during registration, Baccalaureate, Commencement, and the Christmas party.

MR. TRI-STATE
1960

JEROME E. ERICKSON, Mr. Tri-State 1960, is a native of Jamestown, New York. He is a senior in the electrical engineering department and is a member of the Jay-Cees, Booster Club, Tau Sigma Eta, A.S.T.M.E., and the Mechanical Eng. Soc.

"Mr. Tri-State" is selected by a board of judges on the basis of scholarship, leadership, personality, and initiative.

The Mr. Tri-State contest, to be held annually, is sponsored by the Booster Club and the Student Council. The contest was held for the first time this year and received such support from the student body that it will be continued every year.

The board of judges is selected by the student body and consists of two students, one faculty member, one administrative member, and a prominent local person.

MR. TRI-STATE FINALISTS, left to right: Paul Nurnberger, *Dean of Students;* Thomas Malinowski, Gary Secor, Jerome Erickson, Irvin Philbrick, John L. Henderson, and *Acting President* Perry T. Ford.

FRATERNITIES

College students need social experiences to help develop those aspects of personality and conduct not covered by academic work. These experiences they may gain through fraternal organizations. The highest honor to which fraternity members aspire is leadership of their fraternal orders. These men have been picked to lead their fraternities.

The Lambda House

ALPHA GAMMA UPSILON

LET EVERY MAN AID HIS FELLOW MAN

Alpha Gamma Upsilon Fraternity was founded in the fall of 1922 by four students enrolled in Anthony Wayne Institute at Fort Wayne, Indiana. Since then A.G.U. has spread throughout Indiana, Michigan, Ohio, and Pennsylvania, firmly establishing itself as an ever-growing national fraternity.

Lambda Chapter of A.G.U. received its charter at Tri-State on May 8, 1949. From the beginning Lambda Chapter has had continual growth and prosperity due to the many fine brothers that have passed through its doors.

At present the members of Lambda Chapter are working hard at repainting the exterior of the house.

ALPHA SIGMA PHI

Alpha Sigma Pad: Home for Kool Kats

The purposes of Alpha Sigma Phi are to foster education, to maintain charity, and to promote patriotism. Additional objectives of the fraternity are to encourage culture and high scholarship, to assist in building character, to promote college loyalties and perpetuate friendships, to cement social ties within the fraternity, and to foster the maintenance of college homes by chapters for their active members.

From its selection of princesses, the fraternity annually selects a queen. As usual, we are pleased to present our queen . . .

BROTHERHOOD FIDELITY

TRUTH

BETA PHI THETA

Beta Phi Theta was founded in November 1917 as a social organization on the campus of Milwaukee State Teachers College. It flourished purely as a social group until 1942, when the first national convention was held.

In the early history of Tri-State College, fraternities were not allowed on the campus. In 1922 a group of men formed an organization that was called the "Four-Eleven Gang." This organization then opened the first fraternity house on this campus in 1925, and the fraternity was named Lambda Phi Epsilon. In 1929 the Delta Chapter of Beta Phi Theta was chartered from this first Tri-State fraternity.

BETA SIGMA TAU

The House of the Delta Chapter

The Delta Chapter of Beta Sigma Tau traces its history back to 1938, when a group of students organized the Kadimak Society. This group later became the Alpha Chapter of Theta Mu Pi. Two years after Beta Sigma Tau was founded, this latter group became affiliated with it. This took place in October 1950.

From its inception the fraternity has lived up to the motto of "Quality, Understanding, and Unity."

The house on the hill

NUMINE ET VIRTUTE

ΚΣΚ

The Indiana Gamma Chapter of Kappa Sigma Kappa was organized on campus in March 1952. Prior to this date, the Kappa Sigma Kappa house had been associated with various fraternities. The "House on the Hill" served the original chapter of the present Sigma Mu Sigma Fraternity until 1936, when the remaining actives merged with a large national fraternity. After a brief period with a local fraternity, the house became the home of Tau Kappa Epsilon in 1947.

In 1952 Tau Kappa Epsilon withdrew from the campus, and March of that year Kappa Sigma Kappa took over the "House on the Hill."

MISS MOYA HEHS

Memories will last forever within these walls

PHI KAPPA THETA

LOYALTY TO GOD AND COLLEGE

Phi Kappa Theta is a national social fraternity for Catholic men. It was formed by the consolidation of Phi Kappa and Theta Kappa Phi fraternities in April 1959. It concerns itself with the moral, the spiritual, and the ethical conduct of its members by developing in them the art of working and living together in a united fraternity.

The fraternity continually looks to the future. To this end, thirteen acres of land were purchased last year. On this land the fraternity plans to build a new fraternity house and recreational facilities for its members.

SIGMA MU SIGMA

The Alpha Chapter of Sigma Mu Sigma, the oldest recognized fraternal organization on the Tri-State campus, was founded on March 9, 1921.

Sigma Mu Sigma is proud of its history and achievements, both in scholastic and social areas, and continually strives to improve. The fraternity has always tried to develop men with confidence in their ability to meet and associate with people and to fill a useful place in the world. Toward this end, the men of Sigma Mu Sigma will always strive.

Kappa Chapter House

PRO BONO

PROFESSIONIS

SIGMA PHI DELTA

Sigma Phi Delta was founded on Campus in 1947 to fill the need for an engineering fraternity. Since its founding, the society has outgrown its first two homes. For that reason and because it expects to grow with the school, the Kappa chapter is planning to build a modern fraternity house to keep pace with its growth and that of the college.

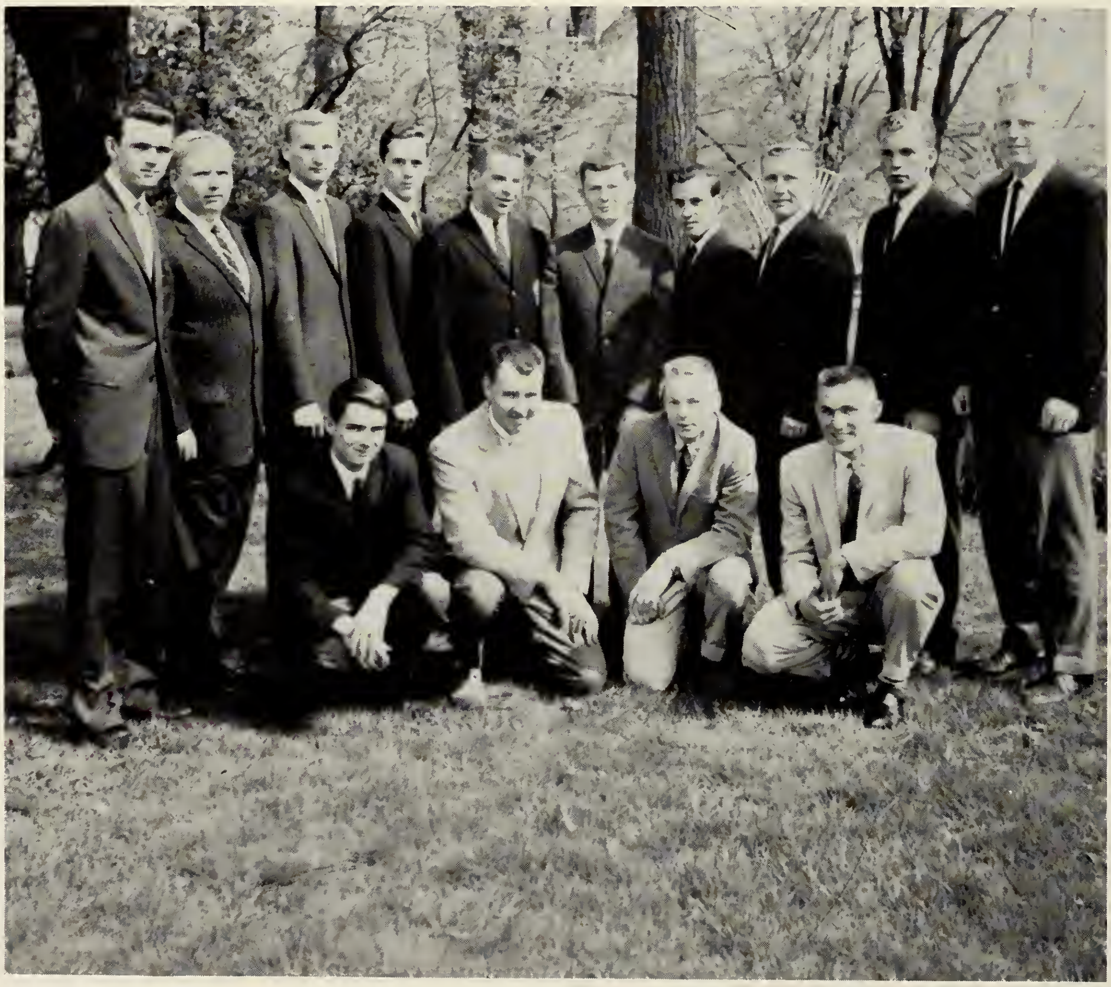
INTRA-FRATERNITY COUNCIL

The Intra-Fraternity Council, an outgrowth of the Pan-Hellenic Council, was organized in 1936. Each member fraternity elects two representatives for this organization. These representatives work to promote the best interests of the fraternal organizations by achieving harmonious relations between the faculty, the administration, the student body, and the fraternities.



STANDING, left to right: Jon P. Hinshaw, David J. Hixon, John Misiolek Jr., Roger D. Flickinger, Ronald C. Stobert, Raymond E. Rondeau, John F. Burroughs, Dennis Williams, Les B. Ickes, Conrad A. Larson.

ACTIVITIES

The canoe race is one of the annual events of Tri-State College. It is held on nearby Lake James. The winners of this year's race are shown here as they complete the course.

INSTITUTE

OF THE

AERONAUTICAL SCIENCES

In addition to the pleasures of social meetings, students of this society derive other benefits. These include special rates for all I.A.S. publications and automatic professional membership after graduation, without payment of the regular fee. The practical applications of college training are presented by means of films concerning the industry and the invitation of prominent speakers to appear at society meetings.

FOURTH ROW, left to right: Russell Patchen, Warren Luke, Phil Edgar, Marlin Bowers, Donald Whitesel, Yacoob Docraat, Roger Flickinger.

THIRD ROW, left to right: Edward Kavick, John Rathjen, Frank Raczek, William Smith, Nicholas Stambula, Robert M. Ault, Alvin Rutledge, Len Szustak, Jay Kessler, Doug Uptegraft, Marv Baden, Don Weaver.

SECOND ROW, left to right: Steve Blate, Joe Toman (Adviser), Marvin Mills, Jon Hinshaw (Treasurer), Dennis Norkus (Secretary), L. Carl Bowman (President), Clarence Wentzel (Tr. Rept.), Lyle Brown, Raymond Rondeau.

FIRST ROW, left to right: Mike Gaitens, Milo Raub, Paul Clawson, Edward Dunaye, Gary Bowman, George Ropchock, Jerry Summersett.

This is the important connection.

Getting ready to test a section.

Instructors DiSabato and Toman enjoy going from this computing device . . .

to this one.

What's he doing?

In April 1948 students enrolled in the Department of Chemical Engineering organized the campus affiliate of the American Chemical Society. Membership in this organization affords students the chance to become acquainted with the professional aspects of their careers. This is the primary purpose of the society.

The society achieves this purpose by bringing important guest speakers to the campus, by presenting films concerning the various areas with which chemistry is concerned, and by arranging field trips to chemical plants in the tri-state area.

The members of the society, in cooperation with the department, annually present displays to show the latest developments in the fields of chemistry and chemical engineering.

STUDENT AFFILIATES OF THE

STANDING, left to right: Harshad Shah, E. A. Campbell, W. C. Assaf, Gary Weltlich, John Eckardt, William Shall, Ronald Temple, Terry Henley, James Oviatt, David Patterson, G. D. Standerfer, and Professor Kenneth H. Slagle.

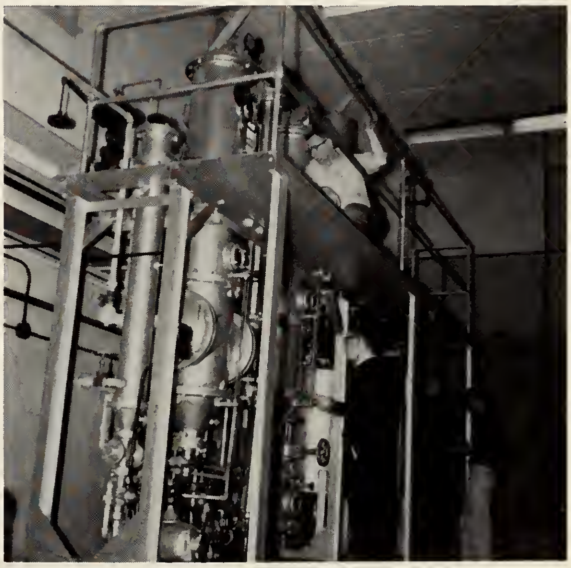
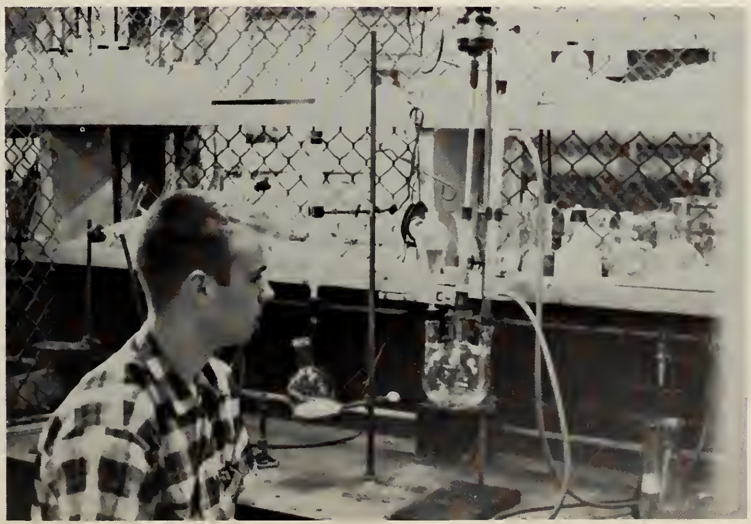
. . . And it comes out here.

AMERICAN CHEMICAL SOCIETY

Two ounces of arsenic for my aunt, please.



All this trouble for a cup of coffee?



I always brew
my own tea
this way.

CIVIL ENGINEERING SOCIETY

Professor Jarrett thanks a speaker.

As a supplement to the classroom, laboratory, and field work, student civil engineers have the opportunity to join the Civil Engineering Society. This affords them the opportunity to learn more about the working practices of the civil engineer in industry and government.

The society sponsors field trips to various engineering and construction projects so that students may observe civil engineering work. In addition, the society sponsors films and invites guest speakers to enlighten the members about new practices and developments in the field.

The importance of the society to the students is reflected by the size of the membership—the largest on the Tri-State campus.

SITTING, left to right: Ronald Humlick, James McCormick, Charles Bowles, James Talbot, Gonzalo Posada, George Arvans, Joseph Petrin, Ismael Guthrie, Calvin Parmiter.

ELECTRICAL ENGINEERING SOCIETY

The Electrical Engineering Society, a student organization whose membership is open to all students, was founded in 1934 for the purpose of acquainting members with actual practice in the field of electrical engineering.

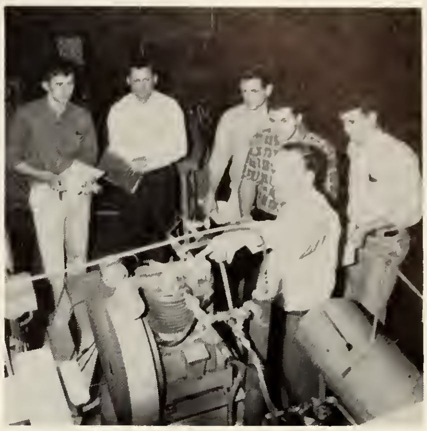
The purpose of the society is the promotion of the social and academic growth of the members. This objective is accomplished through close cooperation with the faculty members and industry. Society programs consist of technical lectures, movies, demonstrations, and social activities. Furthermore, the members regularly make field trips to leading electrical concerns to see the practical application of those theories studied in the classroom.

THIRD ROW, left to right: Robert Whitmore, Dale Titley, Wayne Deeds, Gerald Eaton, Cornelis De Kramer, Ronald Huffman, Harold Myers, Bruce Beebe, Roger Follette.
SECOND ROW, left to right: Ralph Yoder, Kenneth Villyard, D. L. Lovingood (Secretary), W. L. Thaler (President), J. M. Kaufman (Adviser), Max Davis (Vice-President), Yousef Abdulla (Treasurer), C. J. Herron, Robert Bolcik.
FIRST ROW, left to right: Miguel Garay, Carlos Lang, James Cole, Roy Porter, Terry Smith, Kermit Fry, Joseph Blackmer, Harrel Lerch, Errol Plata.

MECHANICAL ENGINEERING SOCIETY

Although members in the society are drawn mostly from students enrolled in the Department of Mechanical Engineering, membership is available for any engineering student.

In order to enable students what will be expected of them in industry, the society has an organized schedule of speakers, films, and field trips coordinated with classroom activities.



Mr. Reynolds clarifies a few points in class.

THIRD ROW, left to right: G. Szymczak, L. Giesecke, Andres Barbe, Zimmerman, B. Hedderick, C. Watt, I. Philbrick, E. Schriver, J. Slate, unidentified, Lutyj, Moulton, B. Johns, H. Nofzinger.
SECOND ROW, left to right: C. Gilmore, G. Carter, K. Null, K. Tullis, Mr. Reynolds (Adviser), D. Hord, T. Hawkins, J. Evans, Lesing.
FIRST ROW, left to right: Harman, D. Paauwe, Hoobler, D. Good, Waterman, Shields.

AMERICAN SOCIETY OF TOOL ENGINEERS

STANDING, left to right: D. Paauwe, T. Hawkins, F. Clevenger, E. Shriver, G. Bidlack, A. Zawisza, R. Drake, R. Verschuren.
SITTING, left to right: D. Moorehead, J. Erickson, K. Null, Douglas Barton (Adviser), H. Arrington, R. Kopp, R. Haack.

To afford students a better understanding of production methods, procedures, and controls, students organized the campus branch of the American Society of Tool Engineers. Although presently an affiliate of National Chapter 56 in Fort Wayne, the Tri-State branch soon expects to achieve status as an indedendent national chapter.

Although only 11 years old, the local chapter of the Society of Automotive Engineers is a growing and progressive society. This has been achieved by close cooperation between the officers, members, and faculty advisers. All members constantly strive to uphold the best traditions of the profession, to improve individually and as a group, and to uphold the creed of the S.A.E. . . . "To promote the arts and sciences of engineering practices connected with the design, construction, and utilization of the automotive apparatus."

SOCIETY OF AUTOMOTIVE ENGINEERS

BACK ROW, left to right: A. Visnapuu, T. Zimmerman, N. Cook, T. Hawkins, E. Shriver, D. Hord, K. Null, R. Johns, D. Kloth, D. Good, S. Sultan, J. Crisp.

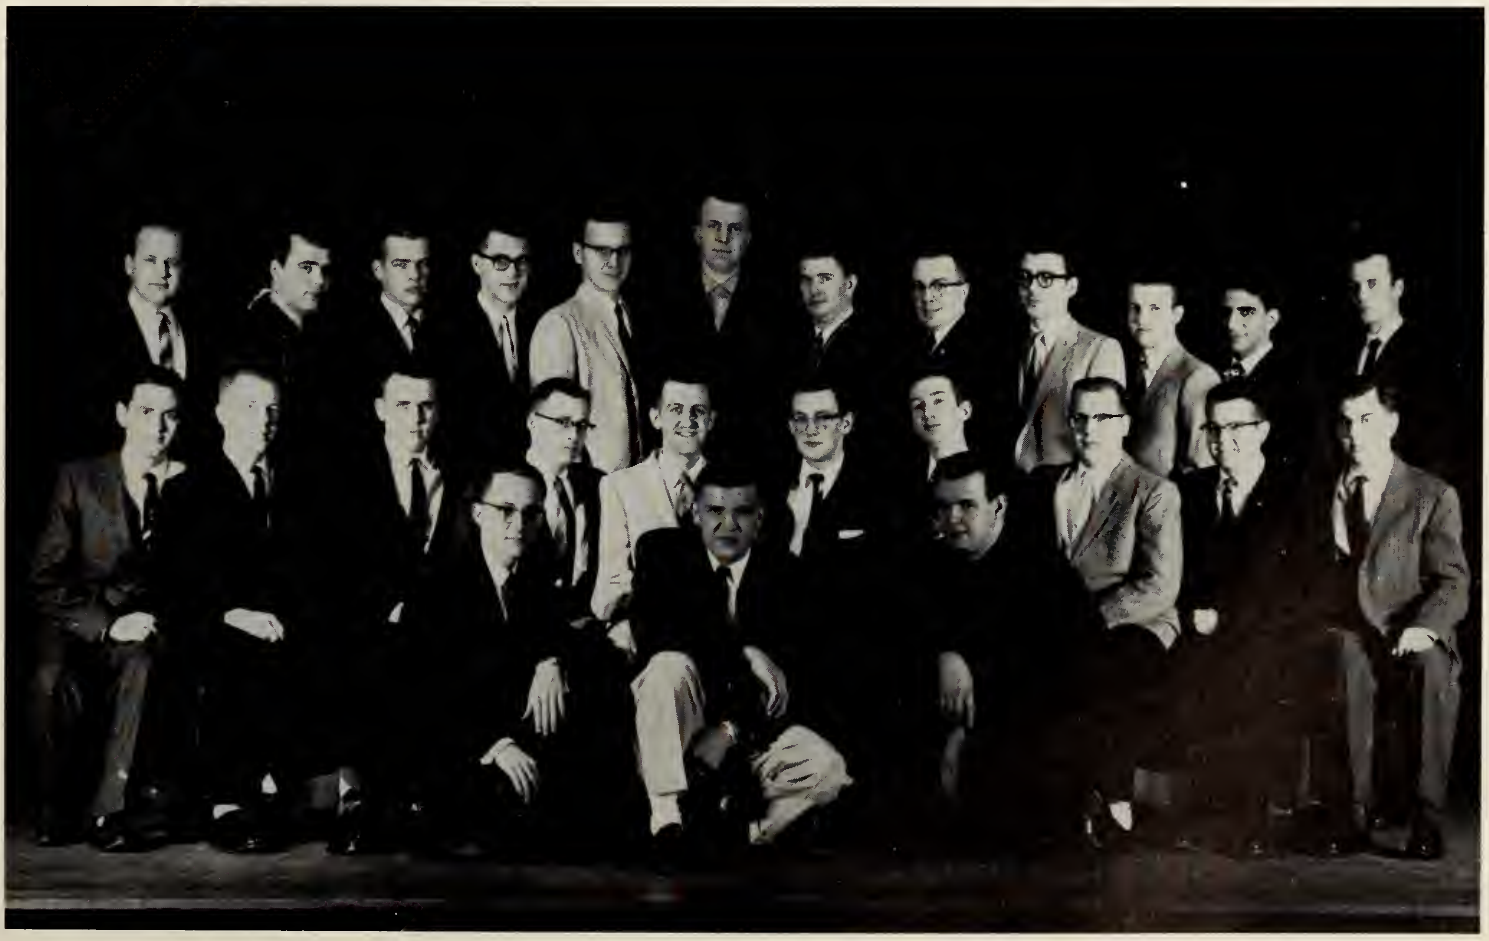
FIRST ROW, left to right: C. Gilmore, C. Snyder, W. Perry.



INSTITUTE OF RADIO ENGINEERS

COMMITTEE CHAIRMEN

SECOND: John Gallihugh, Cornelis deKramer, Bruce Beebe.
FIRST: John Krueger, Robert Bolcik, A. F. Goossens.

The Tri-State chapter of the Institute of Radio Engineers received its charter in the spring of 1960. Formerly the Tri-State student group was affiliated with the Fort Wayne chapter.

The purpose of the student chapter of the society is to promote interest and to pass along information on the latest developments in the field of electronics. At the bi-monthly meetings of the chapter technical developments are discussed and often leaders in the field of electronics are invited as guest speakers for these meetings.

As a term project for the summer term the student chapter is planning to build an electronic integrating and differentiating circuit.

SIXTH ROW: George M. Dorbin, Robert D. Maze, Klaus Wuersig, James O. Farlow, Ivan L. Mack, John T. Gallihugh.
FIFTH ROW: Terence J. Smith, Bruce O. Beebe, Robert S. Bolcik, Gordon R. Knoll, Irvin F. Winkle, Ralph W. Smith, Roar Kjelldahl, Rudolf Dalena.
FOURTH ROW: Cecil R. Pemberton, Edward S. Powell, Roger F. Follette, Earl D. Matchett, David W. Foederer, Alvis Clegg, Delbert Meierhans, Cornelis de Kramer.

THIRD ROW: W. J. Peacock, J. B. Lamirand, Wesley J. Phillips, Wayne E. Deeds, Gerald A. Driscoll, Richard V. Lovett, Dale E. Rush, Opha Watson, Bert A. Astleford.
SECOND ROW: R. J. Biracree, John R. Krueger, Robert J. Fitzgerald, Gerhard B. Grenzberg, Junior Rath, James Bordner, A. F. Goosens, R. F. Hilby, A. E. Cote, Roger C. Reed.
FIRST ROW: Douglas M. Hursey, *Secretary;* George M. Heck, *Treasurer;* Donald N. Morgan, *Chairman;* Lloyd G. Hanson, *Adviser;* Vernon S. Mathisen, *Vice-Chairman;* John F. Merrill, Terry E. Smith, Larry E. Rittenhouse, Ralph E. Yoder, Arnold Saltzman.

STANDING, left to right: Tom Nemeth, Joe Chimera, Sam Boncaro, Robert Mocuilewski, Donald Eagan, Jerry Kurdys, Paul Saalfield, Ray Schneider, Richard Wiest, Dave Watson, Frank Cordero.

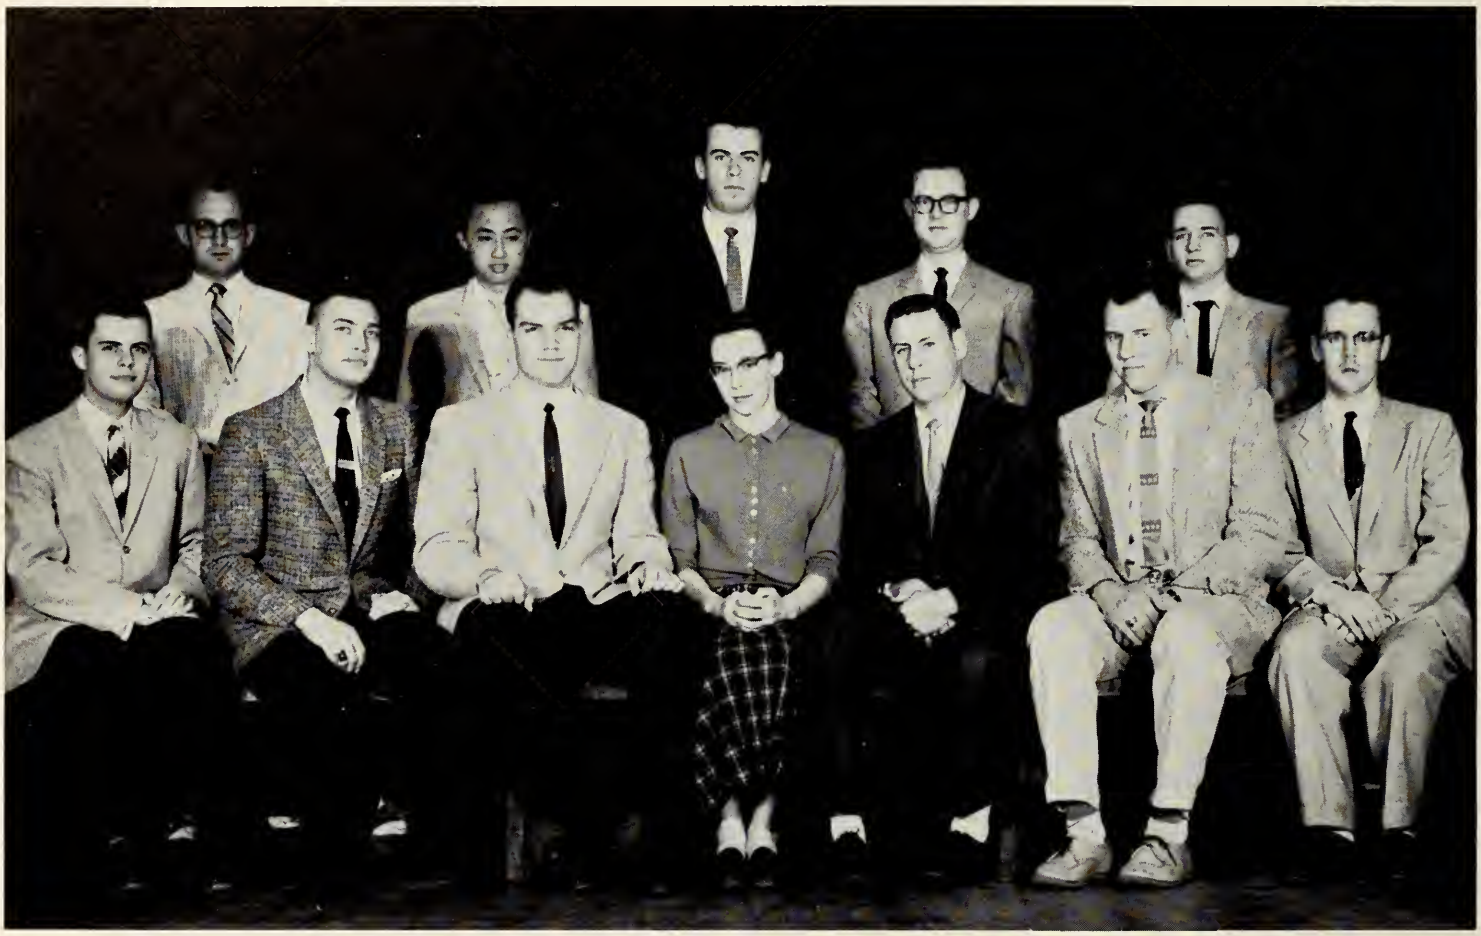
SITTING, left to right: Walter Longbottom, Professor Schadt, Walter Site, George Hamilton, George Rolleston, Norm Chornenki, Gerald Healy, Professor Hilton, William Hodge.

MOTOR TRANSPORT SOCIETY

The Motor Transport Society, although just four years old, is one of the most active and progressive groups on the campus. The organization was formed as an adjunct to the course work presented in the department of Motor Transport Management. The purpose of the society is to develop and increase the interest in problems of modern motor truck operations. This it does by sponsoring guest speakers from transportation concerns and by supplementing classroom theory with field trips to industrial and trucking concerns. In addition, the society works to promote congenial relations and friendships between the members and also increase the student's knowledge and use of self-government.

This year, the society designed and developed an excellent display of a modern trucking transportation center. Through this and other means, the organization expects to promote the best interests of this growing field and gain affiliation with a national transportation fraternity.

SIGMA EPSILON SOCIETY



STANDING, left to right: William R. Byrne, Clinton Tulong, William R. Lewis, William McGraw, Ronald Vaerwyck.
SITTING, left to right: Gary G. Armstrong, George H. Bower, Kenneth T. Schmitt, Jean G. Demorest, Robert D. Lyon, Don S. Miller, Don W. Pilsner.

Membership in the Sigma Epsilon Society is open to students enrolled in any of the three departments of the School of Commerce. Since 1933, when it was founded, the society has afforded members a program of educational and social activities to create a close relationship among the students in the School of Commerce.

At bi-weekly meetings the members have the opportunity to discuss various subjects related to their fields and hear guest speakers from industrial and business organizations.

INTERNATIONAL STUDENTS ASSOCIATION

Membership in the International Students Association is open to all Tri-State students. To further the aims of world peace and promote mutual understanding between people of various nations is the association's highest goal. Another primary goal is to live up to the high ideals and noble purpose shown by the motto: "The essense of unity is brotherhood."

The members of the association, by appearing before student groups and civic organizations of the tri-state area, help to spread knowledge about the lands and the cultures they represent. Within the organization, they also freely exchange this information and work to better understanding among Tri-State's community of nations.

This past year the organization presented an outstanding display of the customs, products, and dress of nations represented by the members.

Membership in the Newman club is open to all Catholic students at Tri-State College. The organization, which was formed in 1956, looks out for the religious, intellectual, and social needs of students away from home.

Each term the members participate in religious instruction and ceremonies. This, along with other activities, helps to intensify spiritual values and improve the daily lives of all participants.

In addition to the well-rounded program of social and religious activities, the club annually has an open house at the Leo Newman Hall. All students on the campus are always welcome to the social activities sponsored by the club.

COLLEGE BAND

The college band, directed by Mr. Roy Bodie, Junior, consists of students and faculty members of Tri-State as well as high school students from Fremont. The band plays at school functions such as class days, commencements, and other special events. Here, the assembled members are ready to give a concert in Fremont.

COLLEGE GLEE CLUB

The college glee club practices long and diligently to prepare for appearances at various college functions, Here, the boys, conducted by Mrs. Robert Ramsay and accompanied by Mrs. Olive Weicht, prepare to show the results of diligence.

TRI-STATE HOME MAKERS

The Tri-State Homemakers, a social organization composed of the wives of faculty members and students, strive to offer educational and recreational opportunities to its members and promote good fellowship.

The organization holds teas and other social meetings for the wives of new students and faculty members. In addition, programs are offered concerning fashions, interior decoration, and other aspects of modern homemaking.

FIRST ROW, left to right: June Briggs, Pat Killmon, Velma Bidlack, Phyllis Long, Sandy Bailey, Eleanor Smith, Clara Hanrahan, Sharon Waterman, Delores Magers.

STUDENT COUNCIL

The representative governing body for the students at Tri-State

The Student Council, a student governing body organized for the promotion and advancement of campus activities for students, is an organization in which their views and opinions may be freely expressed. Representatives elected from each member organization comprise the Student Council, which sponsors social activities, some campus projects, and aids in formulating policies for student organizations.

The college chapter of the Angola Junior Chamber of Commerce was founded in 1954. It is affiliated with the United States Junior Chamber of Commerce, the Indiana Junior Chamber of Commerce, and the Angola Junior Chamber of Commerce. Membership is open to any male student on the campus who has not reached his twenty-first birthday at graduation.

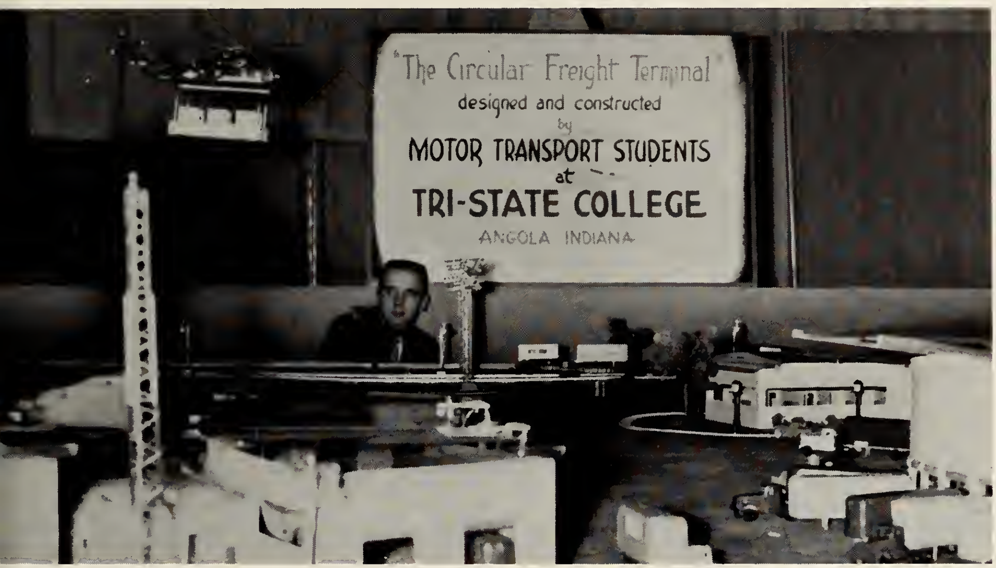
Absent members: Tudi Tan, Ben Mott, Bob Cloutier, Milo Baliey.

When there are not enough coeds to go around, we import them!

MOTOR TRANSPORT DISPLAY

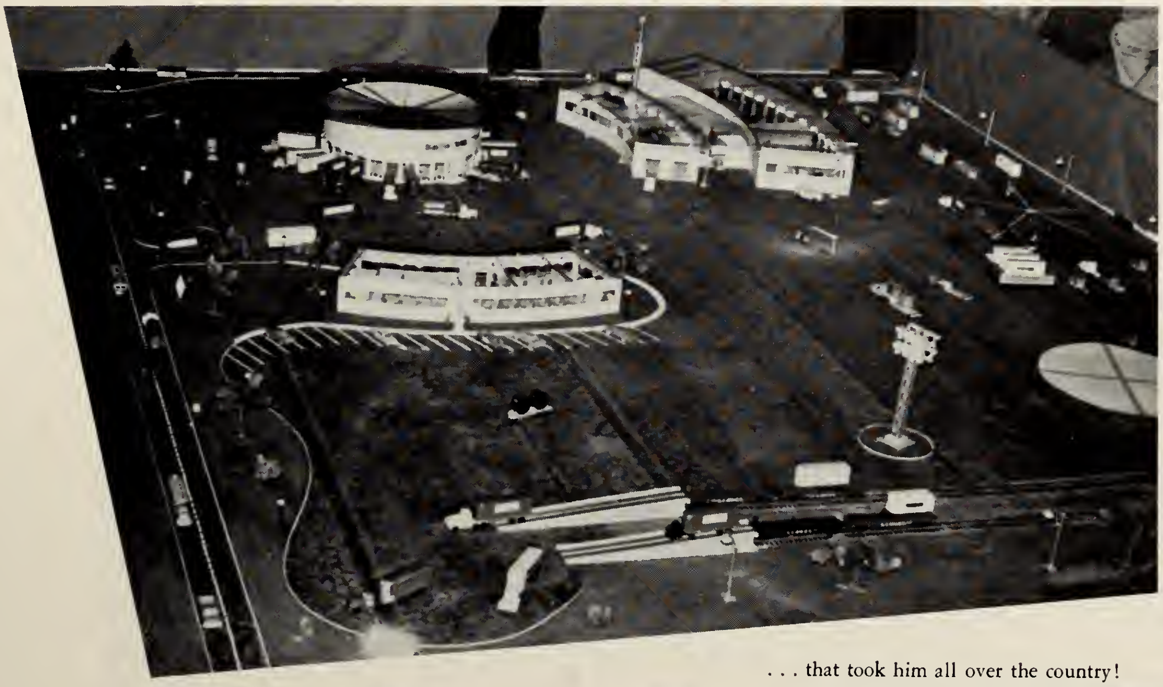
Showing of the circular terminal display model has been a feature at many an exhibit in the United States. Receiving constant publicity by the Tri-State College press, the exhibit became a familiar sight in many of the largest cities in our country.

Designed and constructed by the MTM boys, this display attracted widespread interest and attention at the Chicago Auto and Truck show, the Transportation Week exhibit in Chicago, the Indiana Motor Truck Association meeting in French Lick, and in Kalamazoo and Flint, Michigan, and in Fort Wayne, Indiana.



One night Georgie had a bad dream . . .

. . . which became this reality . . .



. . . that took him all over the country!

members . . .

then introduces

Dr. Bateman, president-elect . . . and Dr. Willig, vice-president elect

held in the Trout Club

Dr. Radcliffe is happy with the faculty turn-out to the party.

The President and the Dean reach for a cookie.

ACTIVITIES

"Ah, ah, mustn't touch," says Billy.

and invites us to the coffee hour.

Um-m-m, sure looks good!

DAYS TO REMEMBER . . .

THE PROM

Remember the promenade line?
and our dates?
weren't they the
sweetest and the
prettiest?

and then the dance? Gosh, how nice it was!

. . . and we crowned a queen, remember, and she was surrounded by her four maidens,

and they, in turn, were surrounded by their bold and handsome knights.

and there were three kings, well, they were the class presidents, Al Stocker, C. J. Herron, and Don Clark,

who, in turn, were surrounded by their lovely ladies, and well-wishers,

and there was much fun and rejoicing, for others came from afar and near to see us off into the brave new world that is ours for the asking.

AND THEN THE CLASS DAY

Dr. Ford welcomed our parents and told them how proud he was not only of us but also of them,

. . . and they sat and listened, some cried but others fought it back as we received one award after another . . .

. . . then the Glee Club stirred up more emotions,

but the biggest deal of them all was when your wife and mine got awards for putting us through.

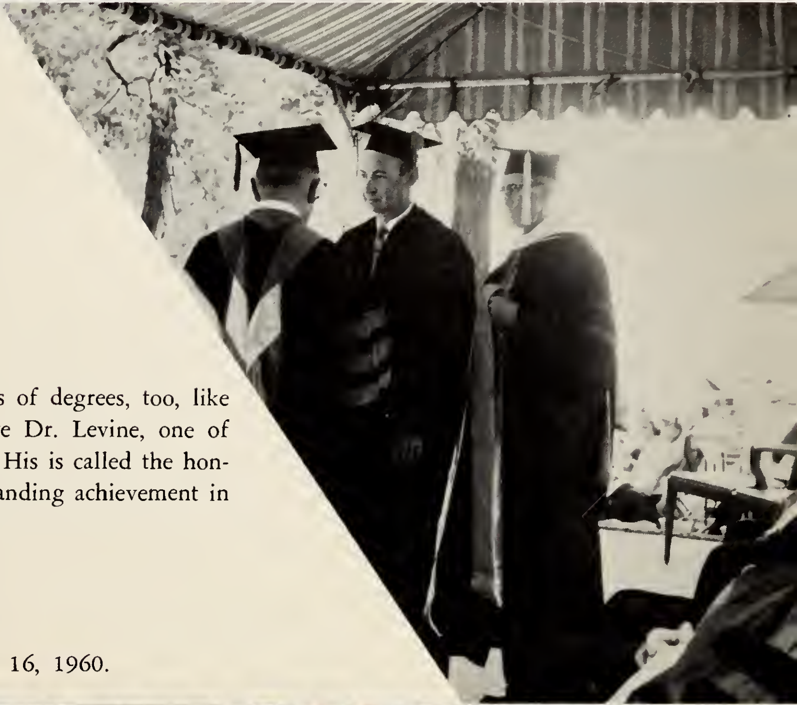
ALL OF THIS FOLLOWED BY OUR

GRADUATION DAY

What a strange feeling I had when I put on my cap and gown. Did you see the proud look and smile on Dad's face. Mom squeezed his arm just to reassure him that here goes our boy, who only yesterday, it seems, was fighting the measles and his first black eye . . .

I saw them sitting there . . . alone, but no, not alone, for there must have been thousands of other parents there. For me, though, there were only my mom and pop . . . this was their day!

and someone said, from away down on the platform, "Will the seniors in Electrical Engineering please rise to receive their degrees." This was it. I stood still and rigid. I knew my eyes looked straight ahead, but I saw nothing, heard nothing, and felt nothing. What kind of a feeling was this? I guess it comes only once in a lifetime, and that only on graduation days, especially from college . . .



there were other kinds of degrees, too, like the one that they gave Dr. Levine, one of us only back in 1951. His is called the honorary degree for outstanding achievement in his chosen profession.

and look here, some more of the gang on that graduation day, June 16, 1960.

After the graduation ceremonies were over, did you see how the president himself came over to our Cathy, shook her hand, and gave her a token diploma for keeping daddy awake at nights. This, I thought, was even more touching than any of the other parts of today's doings. Look at the wife beaming in all her glory . . .

This is the part that I knew had to come before the day was over. I never was much on saying good-byes, let alone talking with college presidents. But Dr. Ford was all man . . . he made sure that he said good-bye and God bless you to all of us. What a guy!

I knew, however, that this was not good-bye! In the years to come I'll always return, if not in body then in thoughts, for here I made my goal in life a worthy one. Here I met and made many friends, enduring and remarkable friends. Here I learned the meaning of loyalty to oneself and to his alma mater. Here I learned the true meaning of self-discipline, something that will have to be a part of me from this day on.

I was made an alumnus of Tri-State College today. Do you know what this means? It means that this school is a part of me forever. I can always come back to these people, not only for a visit, but also for any kind of help that I may need. Can you beat that? Any kind of help!

So long, Dr. Ford, and so long, Tri-State. Note, I didn't say good-bye, just so long . . .

WHAT'S NEW AT TRI-STATE COLLEGE?

What's new??? Why, the dorms are going up, haven't you heard?

What's new??? Look at the trophies; this'll tell you what's new at Tri-State!!!

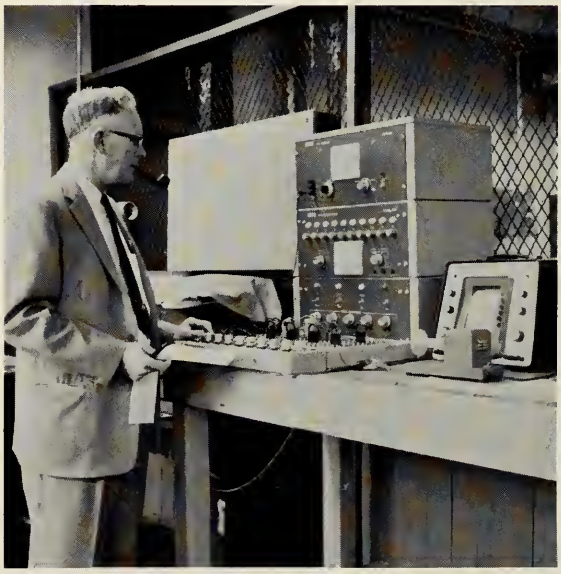
What's new??? Here's the new charter for the Institute of Radio Engineering that is the pride and joy of all students in EE.

AND MORE NEW STUFF . . .

New? Yes, the large, sunny study hall . . .

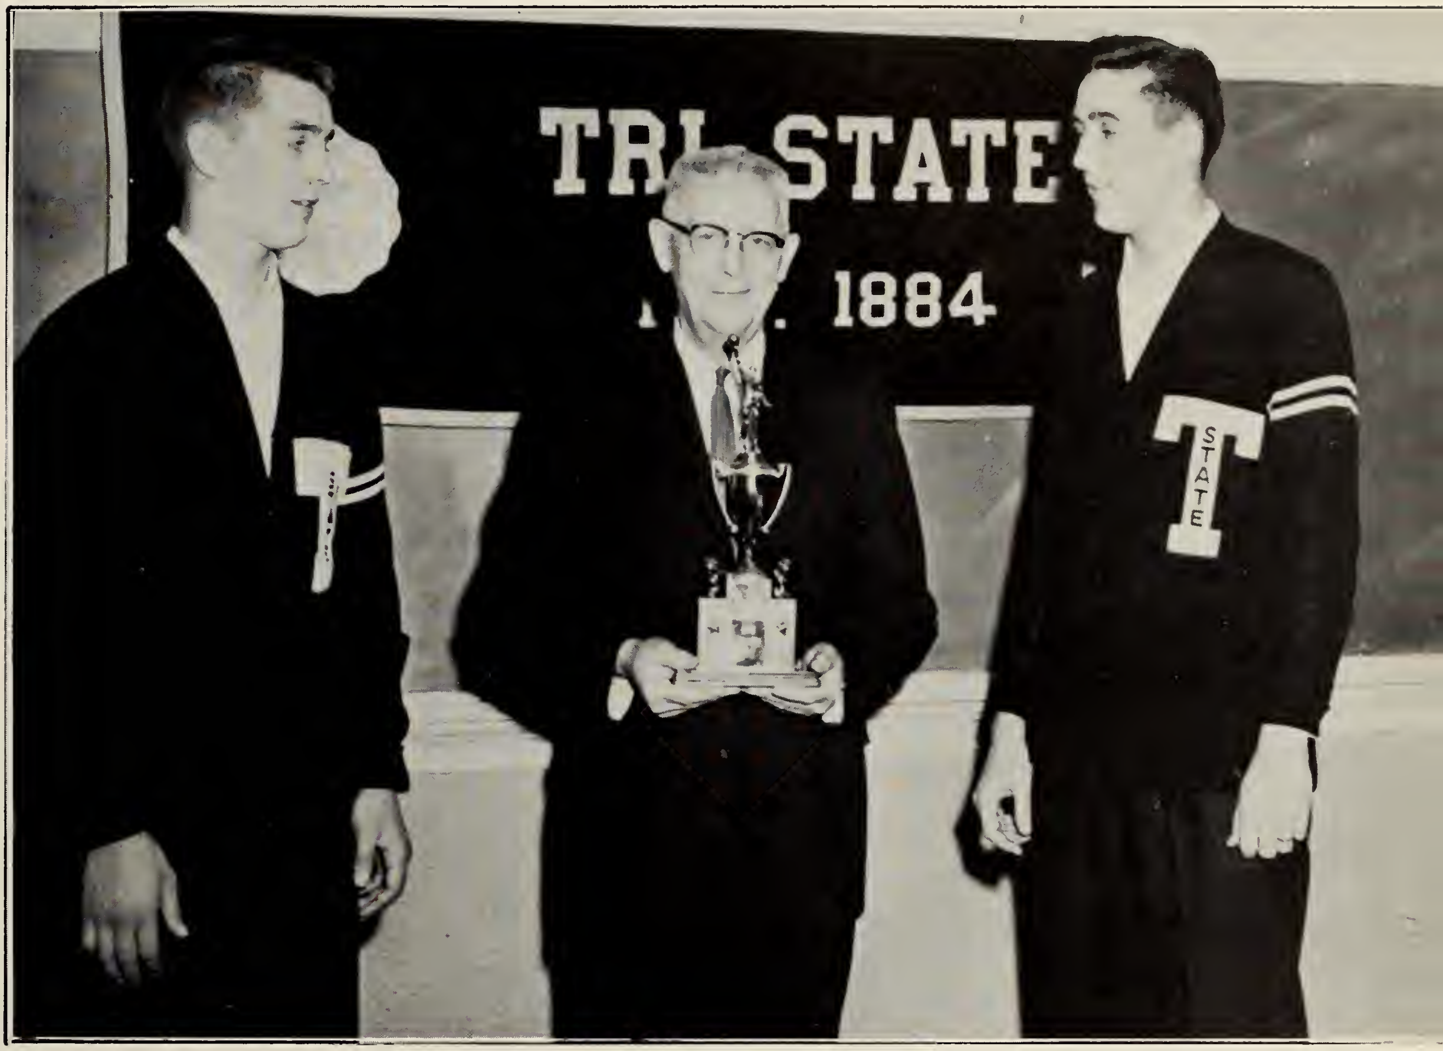
And the great new DEVELOPMENTAL READING laboratory set up by Professor Holub in the English Department . . .

. . . then there are the new math offices



. . . and did you see the brand new computer in the Mechanical Engineering department?

ATHLETICS



"A sound mind in a sound body" states well the philosophy upon which the Tri-State athletic program is built. Baseball, basketball, tennis, soccer, golf, and intramural football make up some of the sports participated in by the students who enjoy these extracurricular activities.

ATHLETIC BANQUET

The Long Johns of the Court

The "bat" boys . . .

The putterrerr-zz

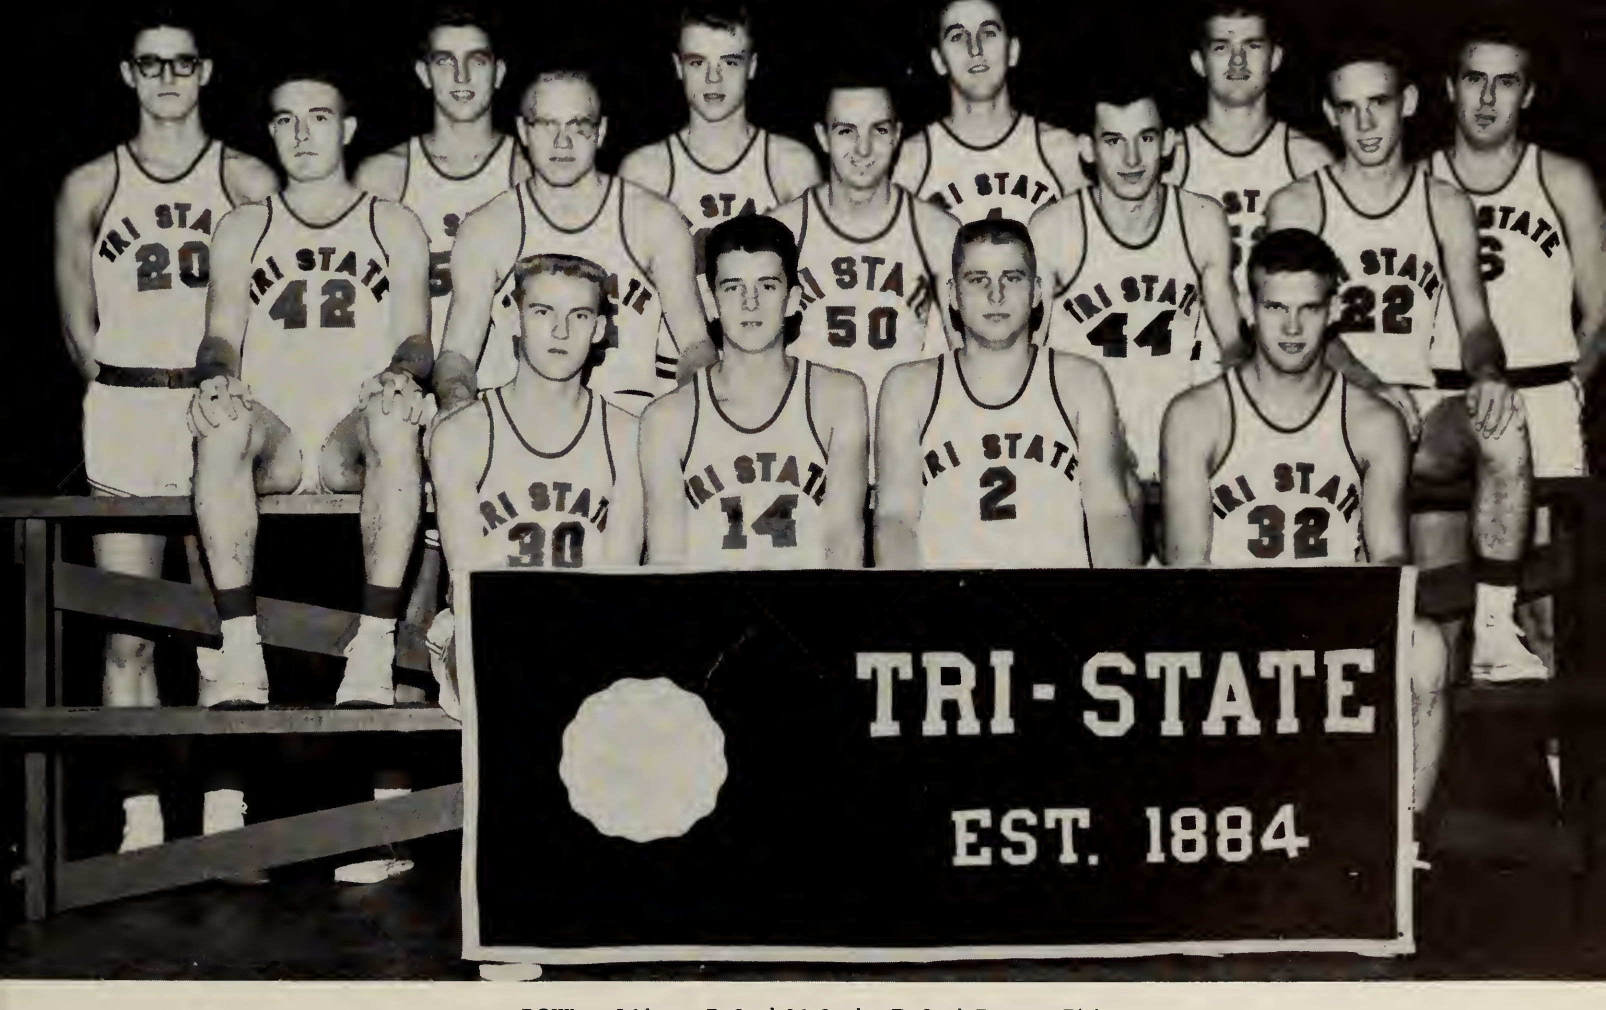
The gang with a racket!

"And they all call me Hilliard!"

Champ sez: "I'll introduce 'im real fast . . . "

Good ole "Doc" Mummert

BASKETBALL



ROW 3: Schlosser, B. Sand, M. Snyder, D. Sand, Brennon, Blair.
ROW 2: C. Snyder, Kraus, VanMarki, Wlodarek, Petry.
ROW 1: Kylonnen, VanMarter, Dygert, Cormican.

The boys in white (that's us) jump ball and follow through to score.

And still they gazed and still the wonder grew
That one long arm could shoot the ball right through!

GAMES

Teams	*Season's Results* Won	Lost
Basketball	8	12
Baseball	2	3
Golf	7	3
Tennis	7	1

There is "one" in every crowd!

We out-jumped them and out-scored 'em.

It's anyone and everyone for himself!

And thar she goes ta-da odder side!

And another point!!!

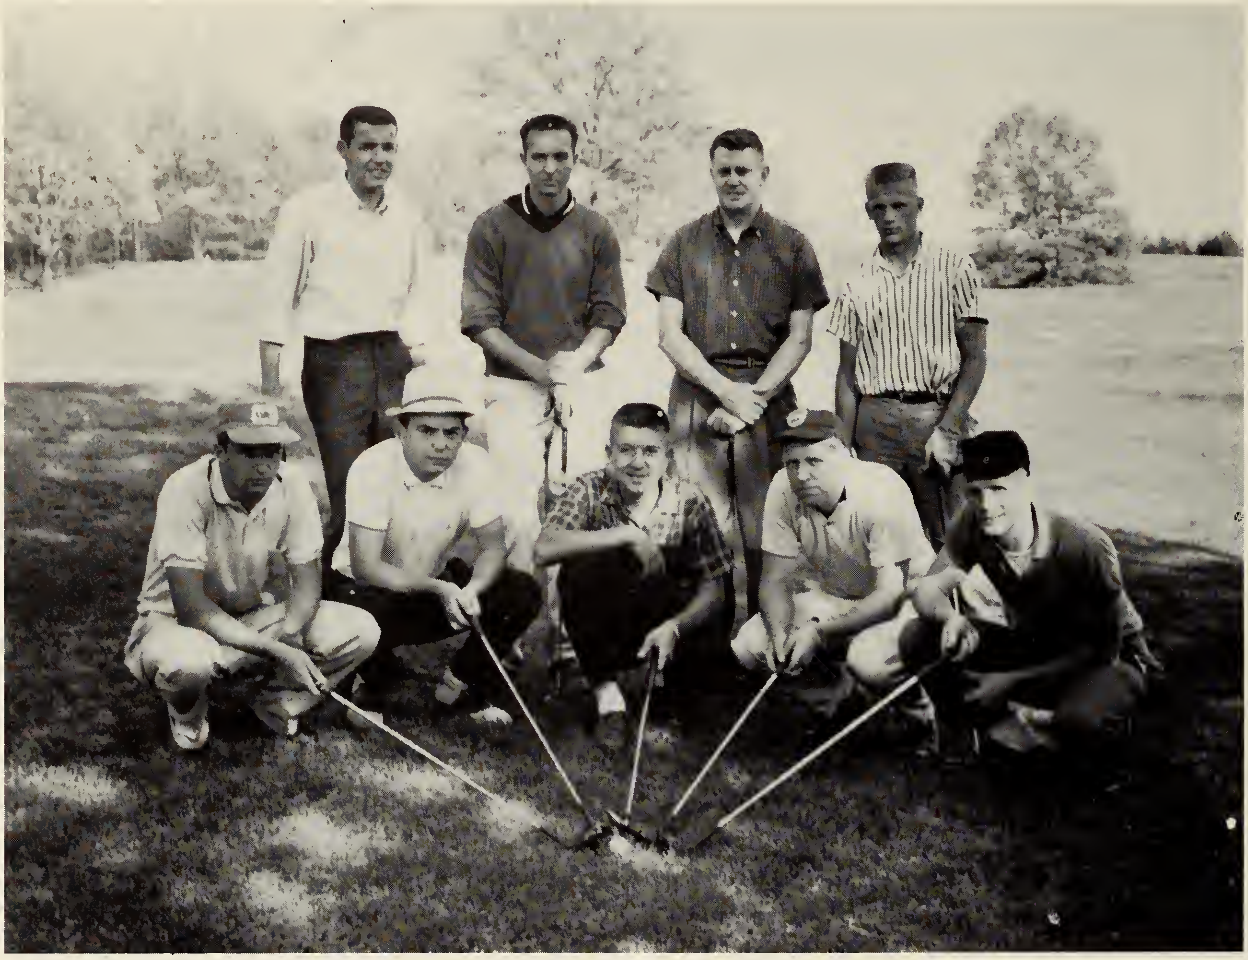
A center jump with our hand . . .

Rochester Invitational Tournament
Rochester, New York

Our "runner-up" Trophy

THE GOLF TEAM

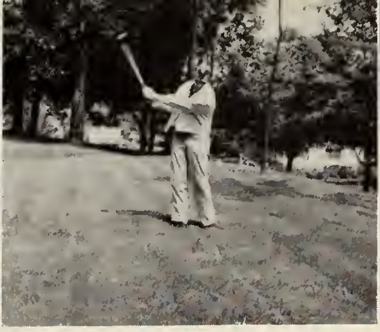
THE CHAMPS



STANDING, left to right: Pim, Marki, Coach Porter, Wetzel
KNEELING, left to right: Silver, Miller, Hahn, Long, Haben

Besides winning state championships, Tri-Staters have a lot of fun with the golf clubs all over the country.

address the ball . . .



. . . work your wrists . . .

. . . hold that elbow . . .

and bend your knees . . .

" . . . don't worry, it's still rollin' toward the cup."

but never take your eyes off the ball!

"Traps in fronta me, traps in back of me . . ."

It'll go 300 . . .

It's the little ones that count.

Roll 'em, roll 'em, golfers, roll 'em!

A nice, easy lift.

You'all just cain't see the ball.

Now if it's golf ya wanna learn, watch me!

THE TENNIS TEAM

Champs in spite of the bad court conditions!

STANDING, left to right: Klein, Henderson, Wong, Lutzie, Biracree.
KNEELING: Rupert.

Readying for the slammer!

Rup is posing for this one.

A fast volley . . .

THE BIG FIVE

TRI-STATE MEN NAMED FOR ALL-CONFERENCE HONORS

Tri-State College team members have been nominated to all-conference teams of the Mid-central College Conference, it was announced recently.
Students winning the honors for their alma mater are the following:

GOLF—Fran Marki, Larry Miller, James Long
TENNIS—Cliffton Wong, Lloyd Henderson
BASEBALL—Joe Brannon

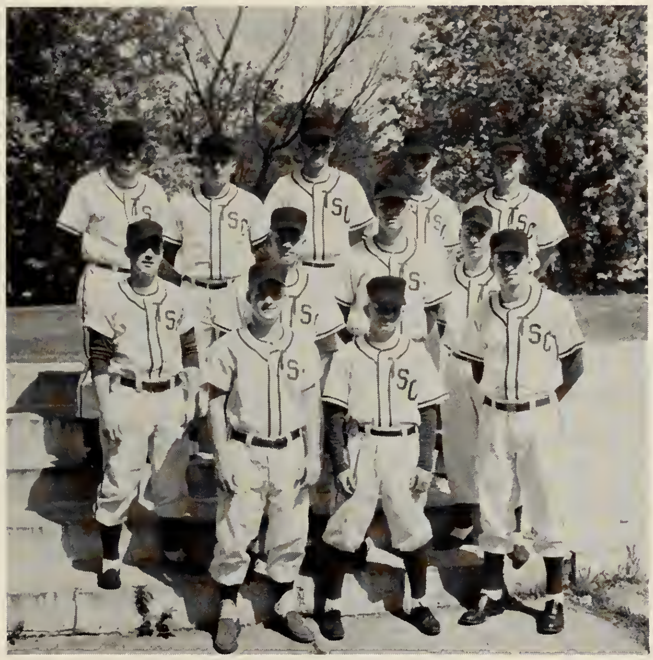
The Conference is composed of Grace, Huntington, Concordia, Indiana Technical, and Tri-State Colleges.

An easy return . . .

A beautiful serve . . .

THE BASEBALL TEAM

DOC'S BASEBALL TEAM



ROW 3: Begier, Ingalls, Brennan, Crary, Challen.
ROW 2: G. Dallinger, Kubic, Lyons, Tullis.
ROW 1: D. Dallinger, Wort, Wlodarek.

The fraternity league boys love the game.

INTRAMURAL SPORTS

And it's the ole dipsey doodle!

There it goes, and where it stops nobody knows!

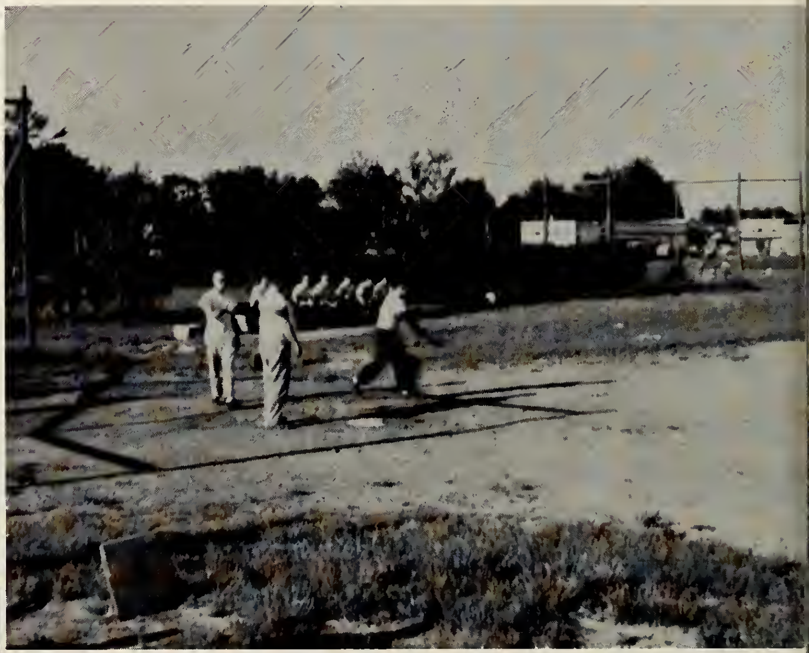
A pitch that never touched a glove.

An easy out at the plate.

A grand slam brings them home.

INTER-FRATERNITY AND DEPARTMENTAL GAMES

Now look, ump, use your good eye!



Good for a double play.

SERVICE

It is truly service with a smile no matter which of the services the student has helping him. He has someone to take care of his housing, eating, reading, printing, cleaning, and filing. Every staff member in the service department tries to make Tri-State a pleasant second home for all students who are away from home.

THE FOLKS WHO STAFF THE OFFICES

Here are the many rays of sunshine that keep us cheerful and smiling no matter what!

Our lovely secretaries who man the many machines both upstairs and downstairs . . .

"That'll be $220 please."

"Yes, we'll admit you, but . . ."

The Kelly, Thomas, and Price team in the Placement Office see to it that all graduates are assured of an interview, and sometimes, a top-notch job in industry.

My kingdom for a house!

THE LIBRARY STAFF

Professor Eleanor Gambardella, head librarian, and her staff, Mrs. Clark and Mrs. Rose.

Within the quiet, meditative atmosphere where a little learning becomes a tremendous thing!

THE BOOK STORE

"Wells's bookstore" is the busiest spot on the campus at all times.

THE NEWS SERVICE

Janice's efficiency with a smile keeps the Print Shop rolling!

Mr. Roy Bodie, Director of the Print Shop, dictates a letter while the other staff members get the addresses readied.

"Now, let's see, where in this mess is the letter 'k'?"

THE PRINT SHOP

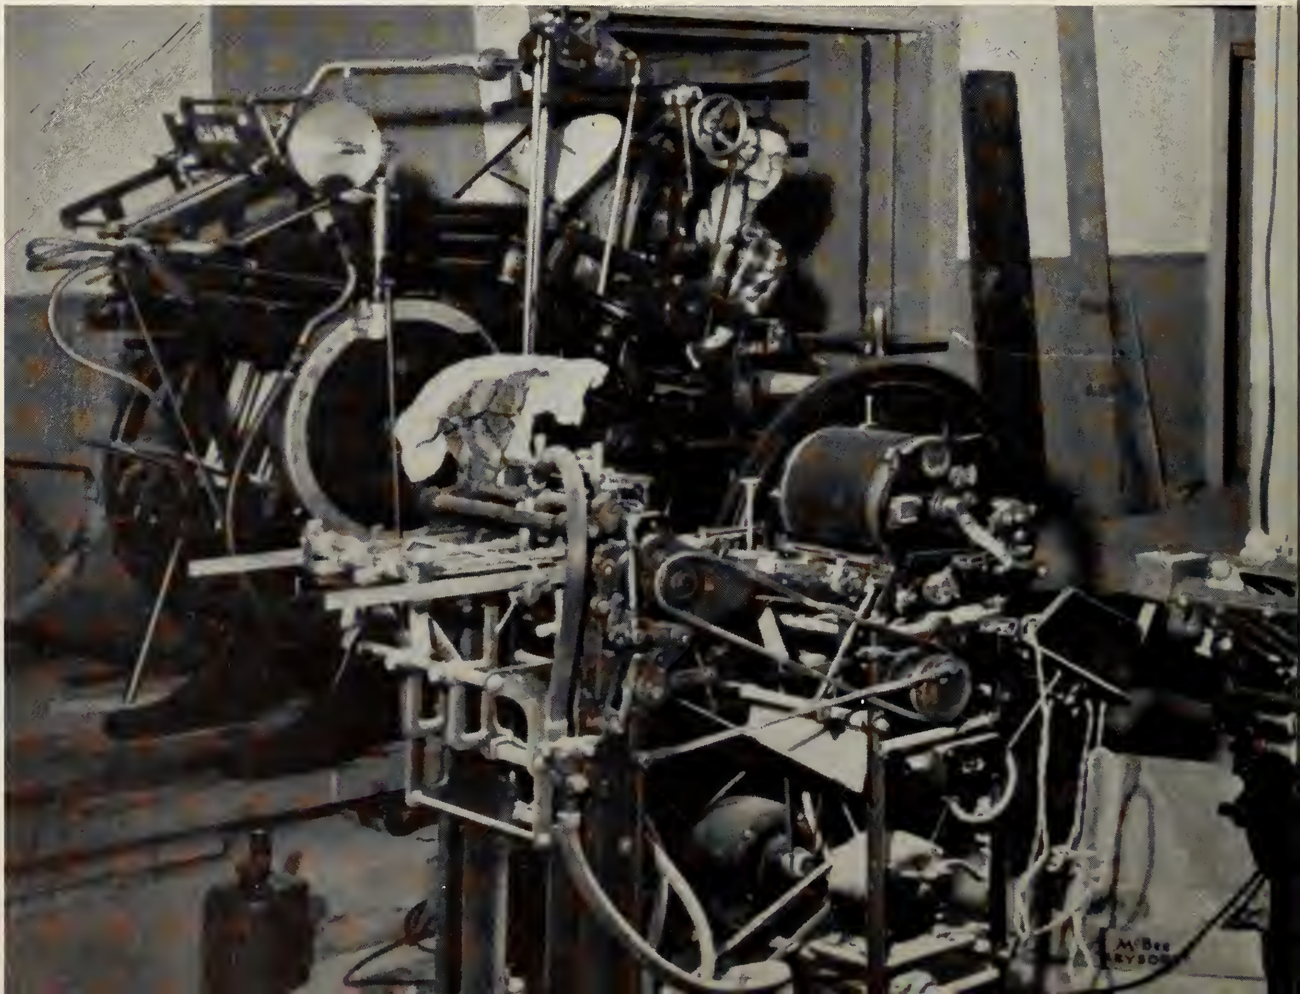
"Sidewalk Supervisors" give the new installations their okays.

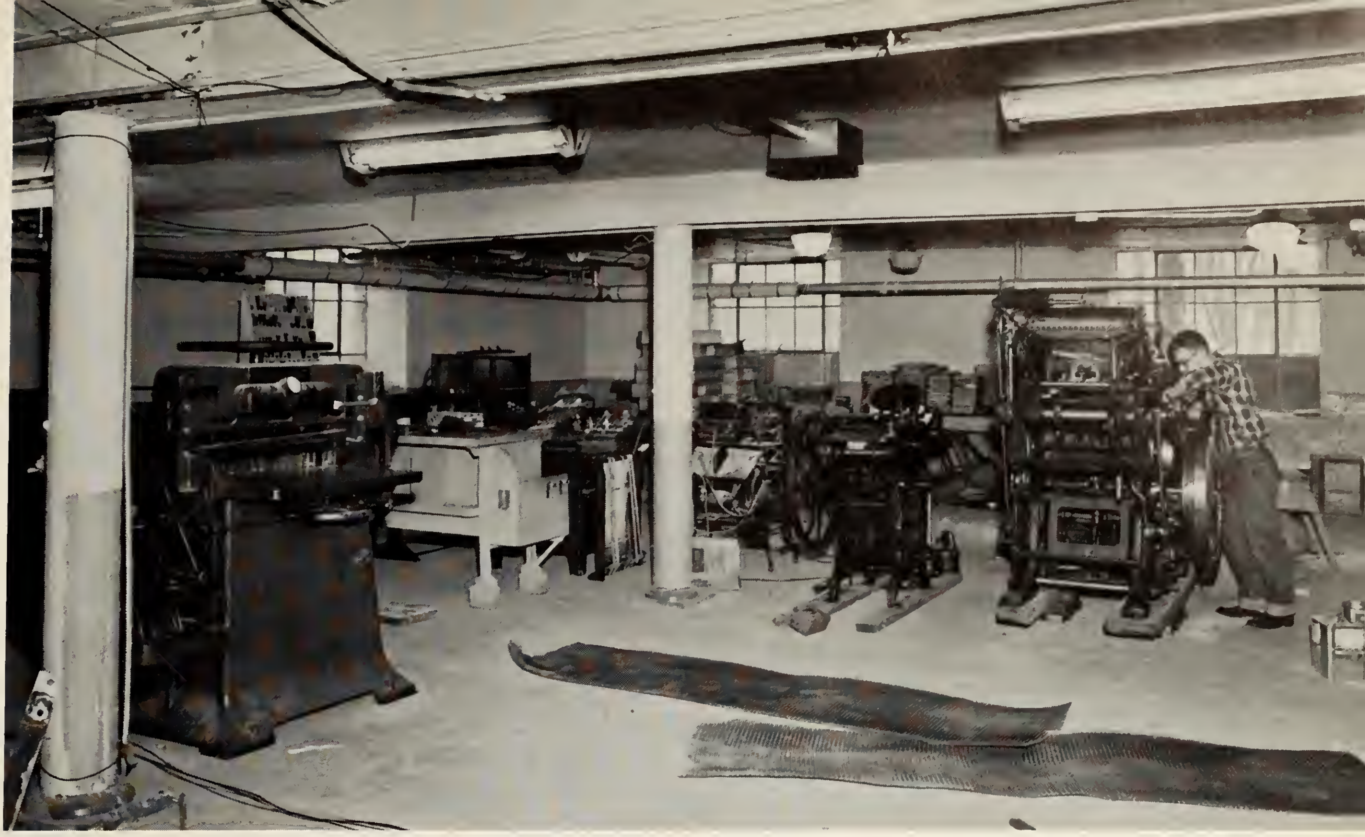
During the 1959 Christmas break, the print shop and maintenance crews moved all of the heavy presses into the back basement hall in the administration building.

The cheerful, well-lighted and ventilated rooms of the whole lower level are constantly humming with the slap of presses, the zip of paper cutting machines, the meshing of addressographs, and the rhythmic click of the multilith.

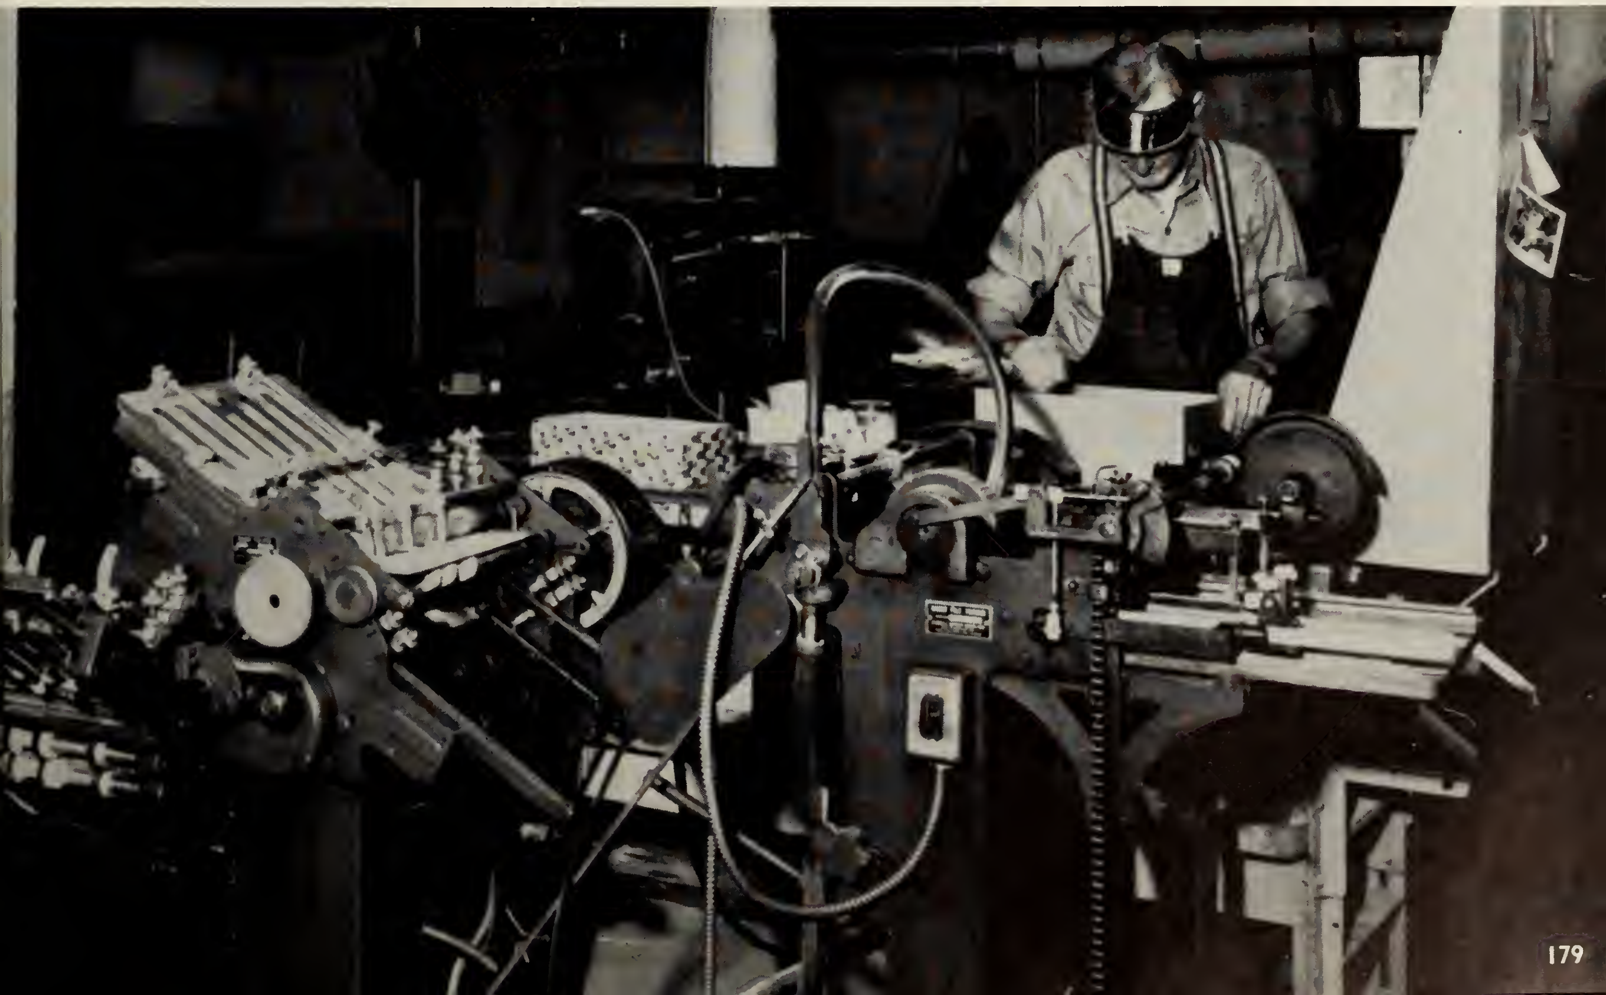
All of this efficiency stems from the expert supervision in the shop by our own professional printer Mr. Roy Bodie.

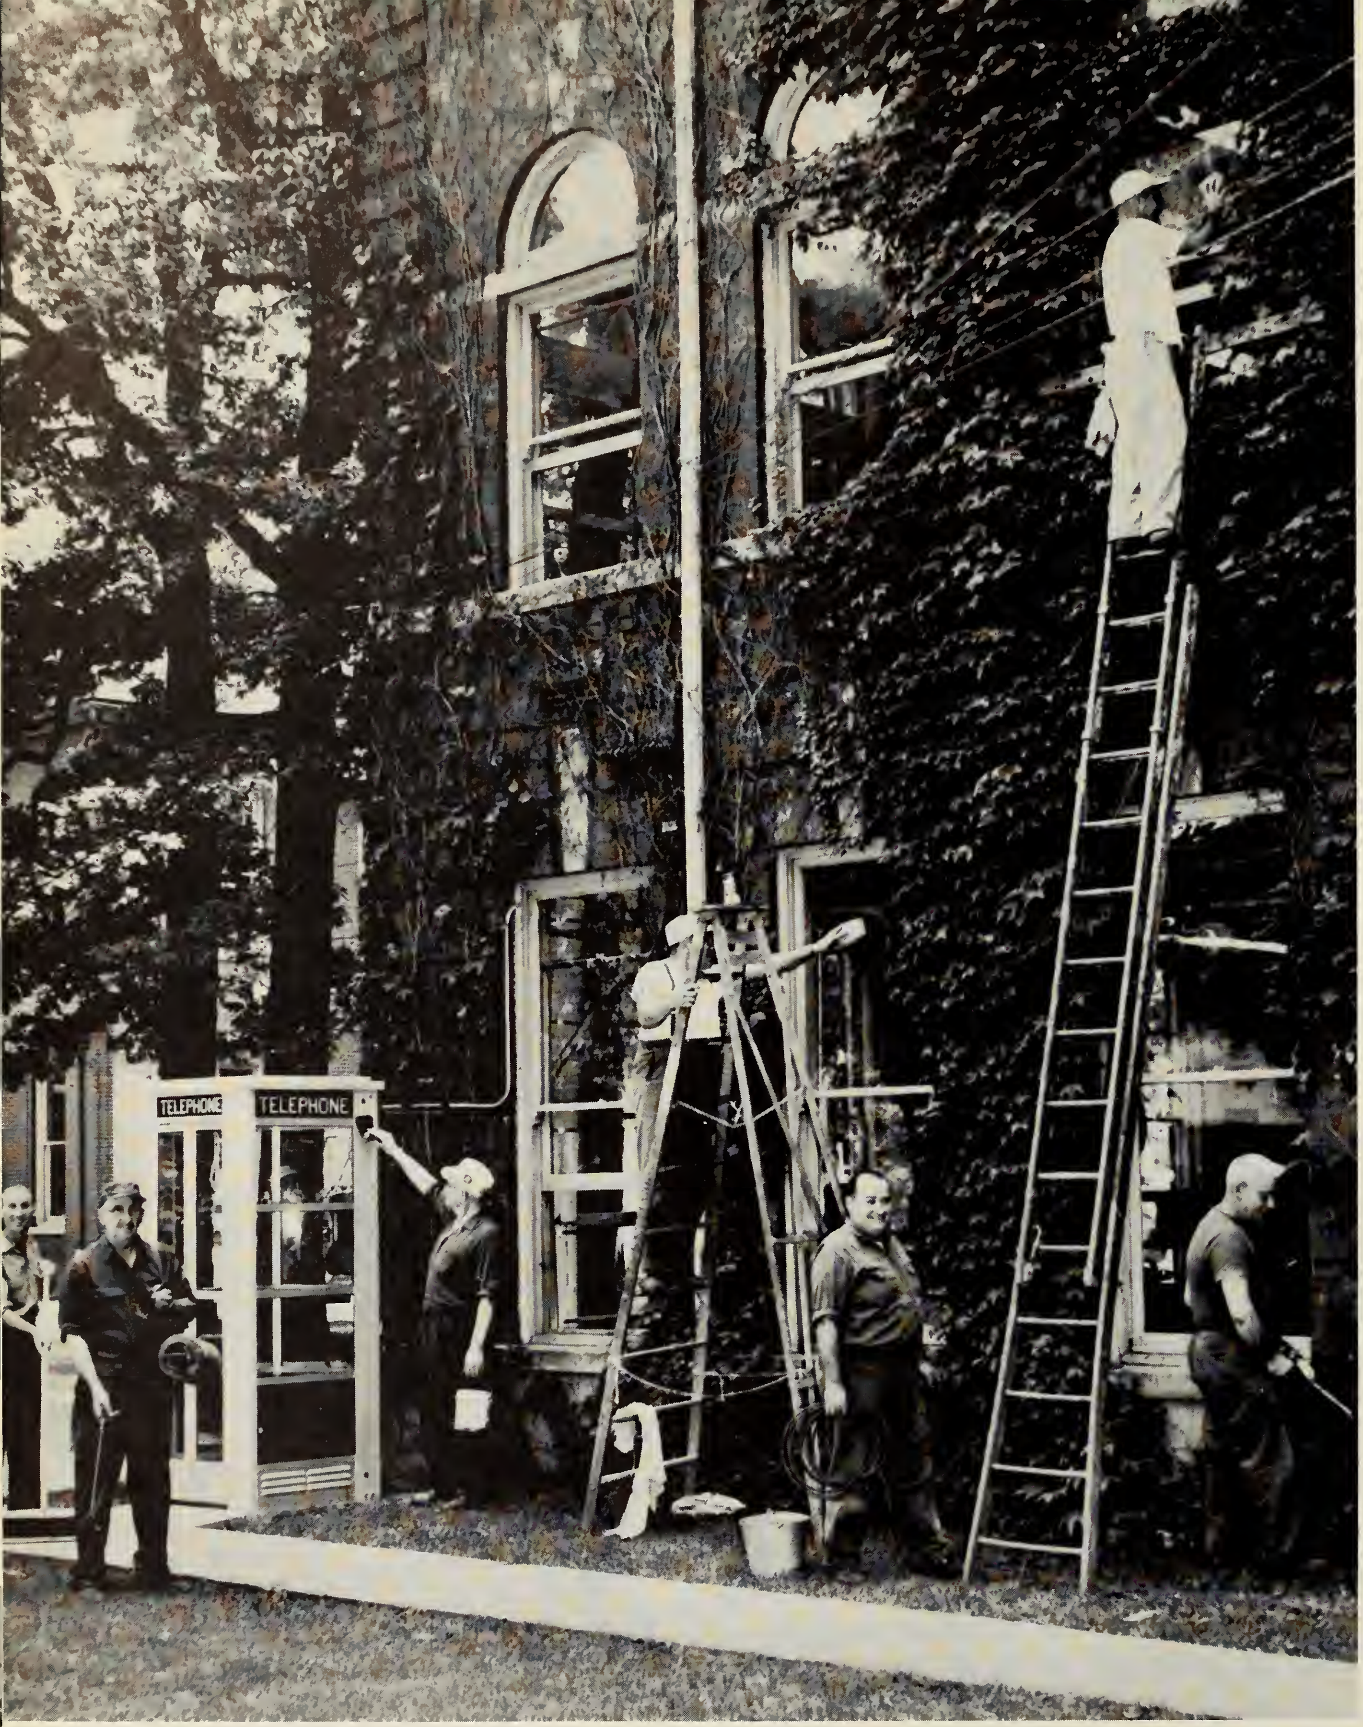
Expert type setters getting ready for a big letter press job.





The presses, fresh from their journey to the basement floor of the 100 building, are inspected for breaks by Johnnie Goodhew.

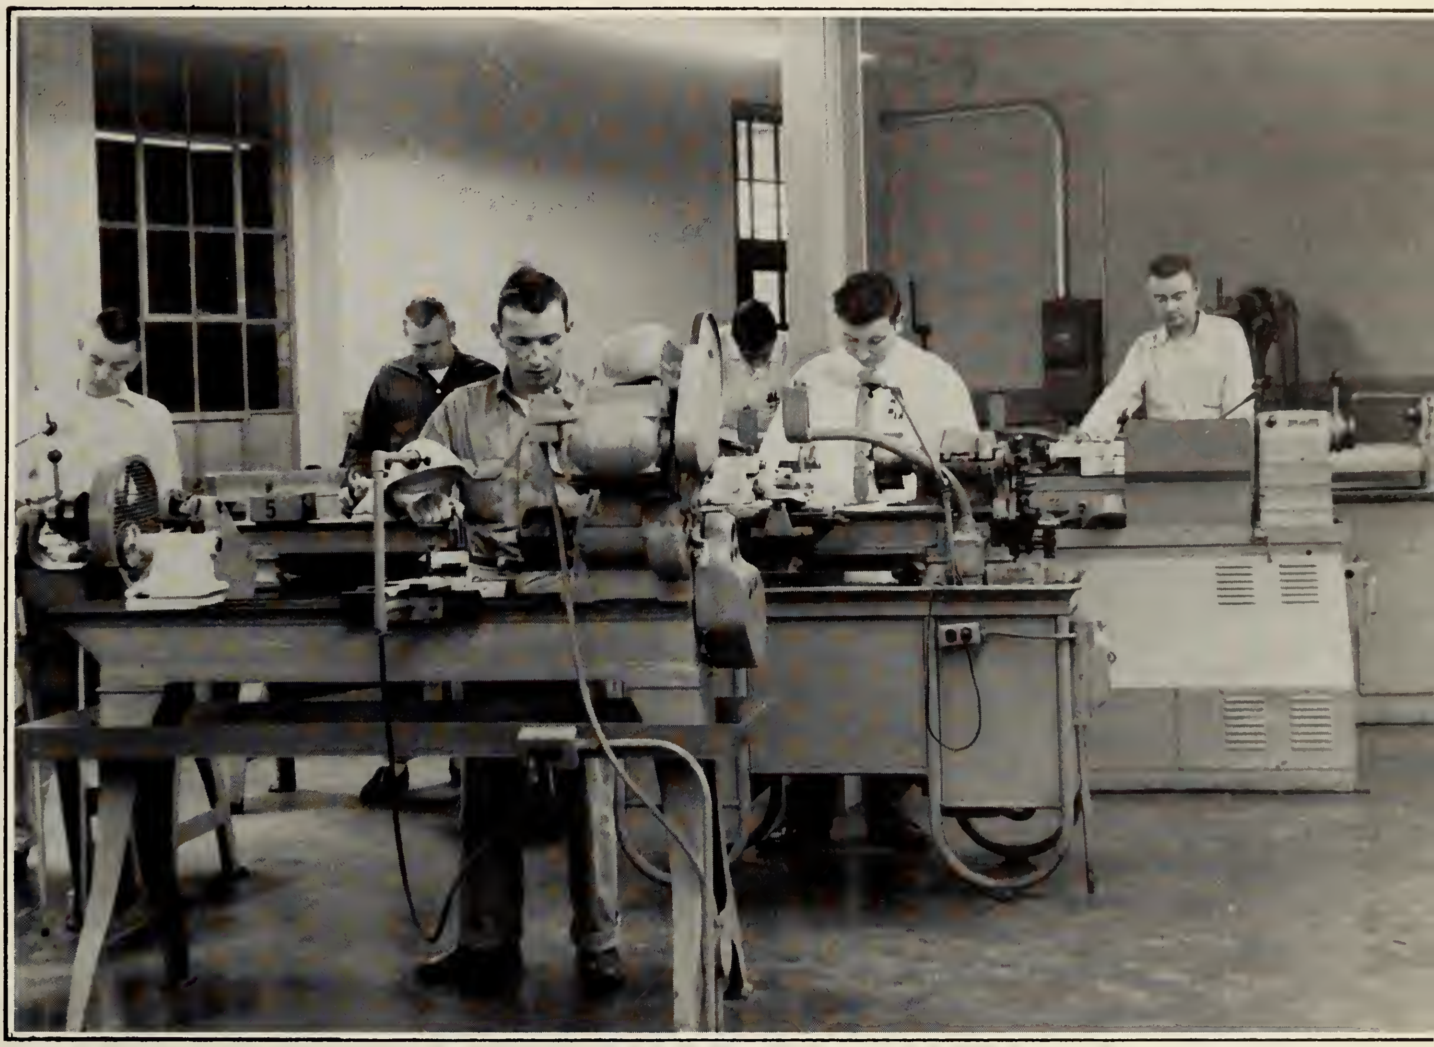




DIAL 87 FOR MAINTENANCE SERVICE

These are the unsung heroes of our campus. Up and at it from the break of dawn, our maintenance men keep us warm in the wintertime, cool in the summer, dry in the spring, and happy in the fall. When we are comfortably snuggled in our warmth of the classroom, Fred Munn and his boys are outside fighting blizzards and cleaning off the walkways for us. In the springtime when a young man's fancy turns to other things than those spelled-out in the classroom, the boys help us along with the buzzing lawnmowers. As only an expert can do it, the maintenance crew can do "anything" and do it well!

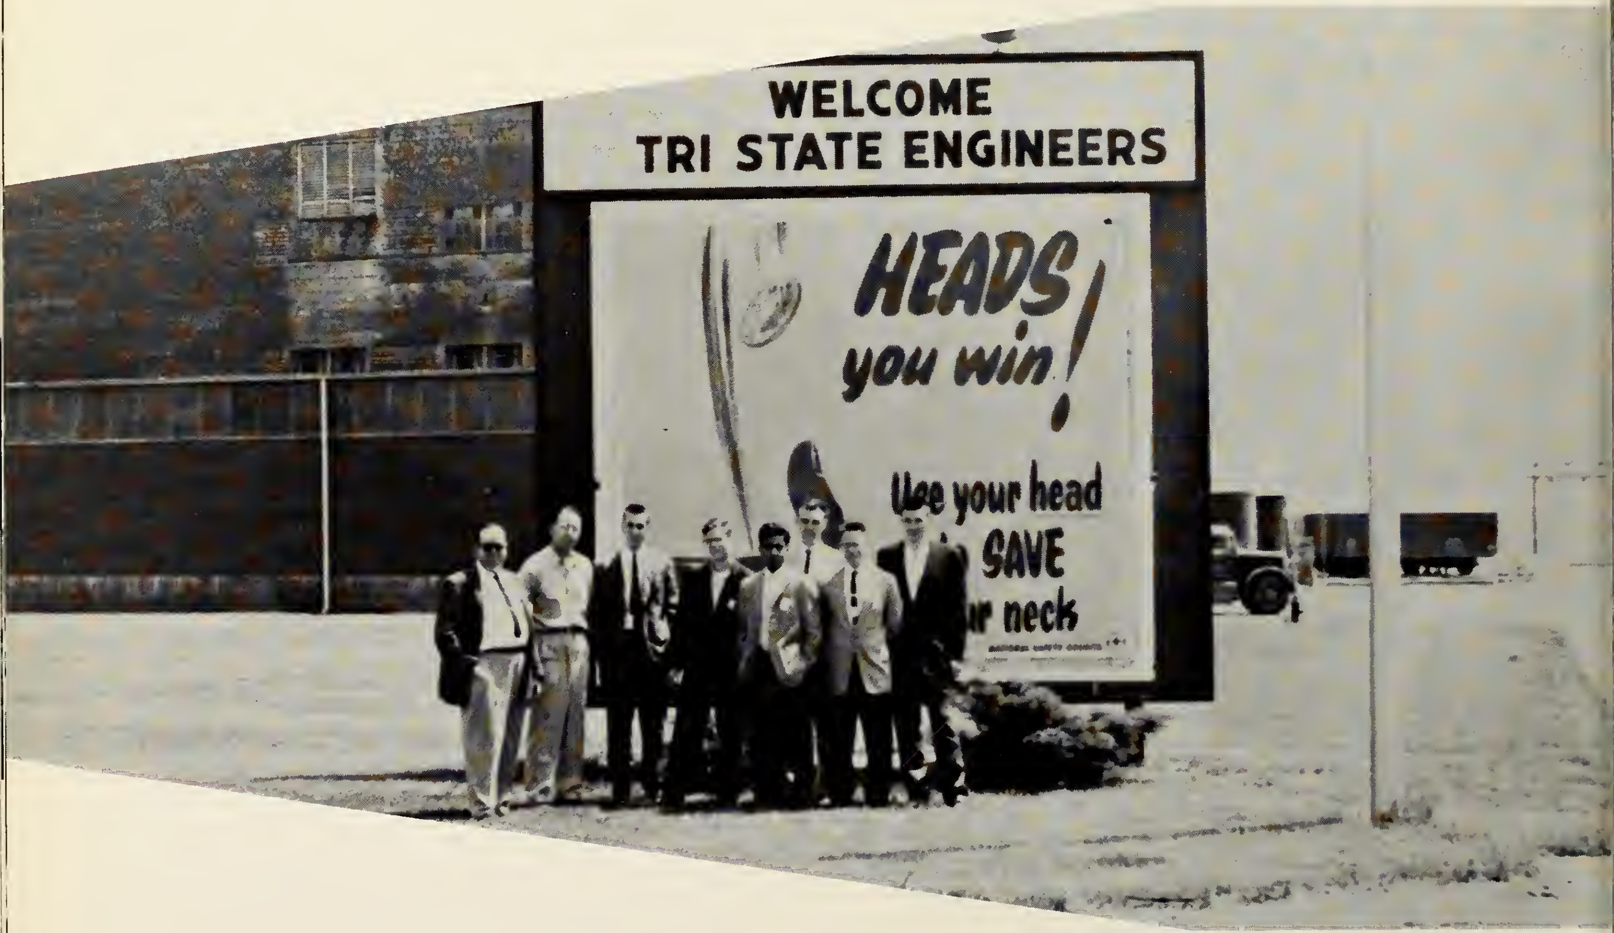
ENGINEERING LABORATORIES



Sometimes we overlook the importance and the value that comes with the work in the laboratories. Here an engineer or a scientist puts to test not only his "hunches" but also his own ability to discipline himself for many hours. Here he must learn to live with himself and his little world of a few colleagues and his dehumanized equipment.

IN A WORLD OF DREAMS AND REALITIES . . .

. . . in the wind tunnel . . . or . . .



. . . in the field

In the laboratory the students learn that "the method of scientific investigation is nothing but the expression of the necessary mode of working of the human mind. It is simply the mode at which all phenomena are reasoned about, rendered precise and exact."

Torsion, helical, tension, bevel, tolerances, or dimensioning . . . you name it and the Mechanical Engineers have it.

A peek into an electronic microscope.

Professor John Humphries, chairman of the Mechanical Engineering Department, lecturing on the analysis and the use of the antilog computer.

Automatic Industrial Controls Laboratory

THE CIVIL ENGINEER

He will build you a road, a dam or a bridge. He will align your property line, dimension your house, or make a test of your soil. He will draw a map with contours all around and from it show you the exact spot on the ground.

In these series of pictures we see students in a civil lab setting up a theodolite and doing some land surveying near the campus.

Because this work is best done on a clear day, the Civils are nicknamed "The Sunshine Boys."

Terry gets to the bottom of things.

. . . and without heat there is nothing!

Men and Machines compete for perfection.

The profs bone up for lab.

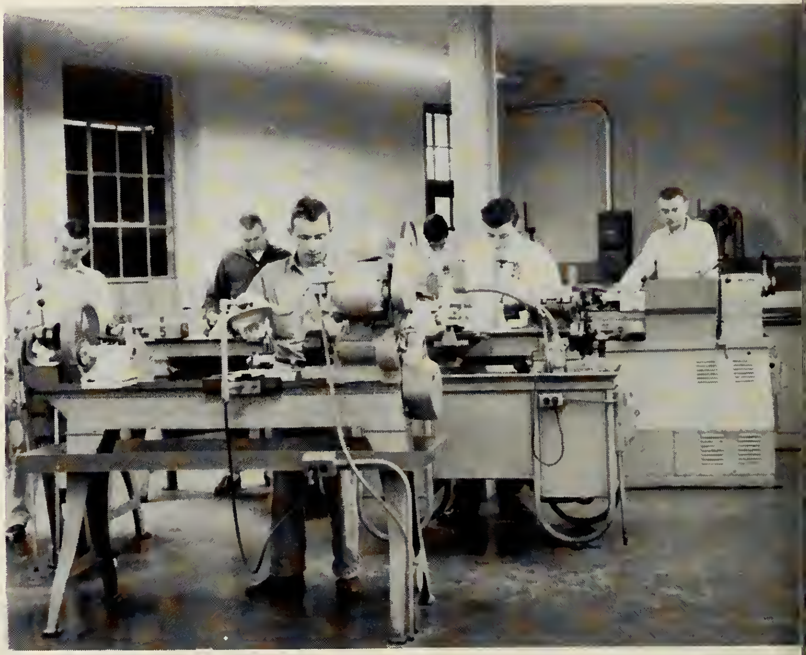
fuels . . .

lathes . . .

drills . . .

Thermodynamics, flow of fluids, lathes, heat transfer, calorimeters, and fuels are only a small portion of new words that students pick up while working in the laboratories that are so up-to-date and complete with the best equipment in the country.

moulds . . .



and grinders.

LABORATORY RULES

study the experiment
plan the work
do it efficiently
start promptly
time your work
be clean and neat
read the labels
be economical
be cautious
be independent
write clearly and
intelligently

Four Injured In Auto Mishap

Four persons were injured Saturday at the intersection of highways 120 and 27 north of Angola when the car driven by Alvie E. Burton, 21, of Murdoc failed to yield the right of way on 120 and crashed into Henrietta Sprandel, 42, of Fort Wayne, who was traveling south on 27.

Henrietta Sprandel received abrasions and contusions about the body and three passengers in her car, all of Fort Wayne were also injured. Sally Sprandel, 10, received cuts on the ankle and right elbow contusions; Robert F. Meyer, 74, contusions and abrasions to right elbow and head, and John Sprandel, 16, suffered a cut on the right arm.

Burton was arrested for failing to yield the right of way.

Nixon Three To Two Vote Over Kennedy

Results of the mock presidential elections held on the Tri-State College campus on Wednesday, August 31, show 210 votes for Richard Nixon and 140 votes for John Kennedy, according to the report announced by John Lloyd Henderson, Waycross, Georgia. Mr. Henderson is president of the Booster Club, which sponsored the election as an interest project.

Voting was not restricted to students, but was open also to faculty and administrative personnel, with the total of 350 votes cast representing somewhat less than 50% of the students enrolled. Only two candidates were listed on the ballots.

The age limit of 21 did not apply in this election, but participants were asked to give their ages, marital status, and in the case of students, to state whether enrolled in the School of Engineering or in the School of Business Administration.

The Engineering School was represented by 275 voters, with 53 voters from the School of Business Administration. Engineers voted 163 for Nixon, 112 for Kennedy, with 33 Business students voting for Nixon and 20 for Kennedy.

In the age group 18 to 20, 24 voted for Nixon, 18 for Kennedy; ages 21 to 24, 97 for Nixon, 61 for Kennedy; ages 25 to 29, 56 for Nixon, 48 for Kennedy; and 30 or over, 26 for Nixon, 13 for Kennedy. Married voters gave 85 votes to Nixon, 64 to Kennedy, single voters, 123 for Nixon and 65 for Kennedy. The foreign student vote was divided, 9 for Kennedy, 8 for Nixon.

Twenty-six states and the District of Columbia were represented in the voting, with Indiana giving Nixon 49 votes to Kennedy's 28; New York, Nixon 27, Kennedy 23; with the four votes from Massachusetts divided 2 and 2.

The committee in charge headed by James Harmon, Marion, included Jerry Strayer, LaGrange; David Stegemoeller, Indianapolis; John Schmidt, Oakville, Connecticut; and Salim Sultan, Dammam, Saudi Arabia.
